1. Introduction

Arctrieval is a unique software-based approach to obtaining and managing medical records, billing information, and imaging studies for legal professionals. Filevine is a leading case management system law firms use to manage their business.

Arctrieval's integration with Filevine is our commitment to our mutual customers. This integration provides additional functionality and features that not only improve the workflow for you, but also enhance the user experience, making your work more efficient and effective.

When it comes to integrating Arctrieval and Filevine, we offer you two flexible options. This allows you to choose the setup that best suits your needs, giving you the power to control your integration process.

1.1. Setup Option 1: Standard Configuration

In the baseline configuration, you will enter Filevine Personal Access Token into Arctrieval, create a subscription, and import the pre-built Arctrieval Client and Arctrieval Request sections into one or more Filevine Project templates. The Arctrieval Client and Arctrieval Request sections operate independently of the other Filevine Project templates.

If you can access the API Credentials in the Advanced Menu and the Import/Export functionality in the Customs Editor, setting up the default configuration should take 10 minutes to complete.

1.2. Setup Option 2: Custom Configuration

In the custom configuration, you will enter Filevine Personal Access Token into Arctrieval, create a subscription and enter Arctrieval-specific fields into the desired sections in a Filevine project template, and adjust the mapping in Arctrieval.

You will need access to the API Credentials section in the Advanced Menu and access to the Customs Editor.

An experienced Filevine System Administrator or Filevine Integration partner should set up a custom configuration. If you need assistance with a custom integration, Arctrieval is happy to introduce you to a Filevine Integration partner. Arctrieval does not have the advanced knowledge to assist with a custom configuration.

2. Functionality Overview

Arctrieval's integration provides the following functionality between the two systems.

1. Client Information
 - a. Import Filevine Client information from the Filevine Address Book into an Arctrieval Client record through the Arctrieval Add Client process. One client is added from Filevine to Arctrieval at a time.
 - b. Pull updated Filevine Client information from Filevine Address Book into the Arctrieval Client record through the Arctrieval Client Activity Update From Filevine process. Client information is updated in Arctrieval one Client at a time.
 - c. Push updated Arctrieval Client information from Arctrieval Client records to Filevine Address Book through the Arctrieval Edit Client process. When Client information is updated in Arctrieval, the Arctrieval User is prompted whether or not to update the information in the Filevine Client information in the Filevine Address Book.
 - d. Link an existing Arctrieval Client record with an existing Filevine Client in the Filevine Address Book.

- e. Remove the link between Filevine Client information from Filevine Address Book and Arctrieval Client record. Only an Arctrieval Attorney Firm Administrator or Arctrieval Attorney Firm User (with the appropriate permission) may break the connection.
2. Medical Provider Information (Arctrieval Contact)
 - a. Import Filevine Medical Provider information from the Filevine Address Book into an Arctrieval Contact record through the Arctrieval Add Contact process. Each medical provider is added from Filevine to an Arctrieval Contact one at a time.
 - b. Pull updated Filevine Medical Provider information from Filevine Address Book into the Arctrieval Contact record through the Arctrieval Contact Activity Update From Filevine process. Contact is updated in Arctrieval one at a time.
 - c. Push updated Arctrieval Contact information from the Arctrieval Contact record to a medical provider in the Filevine Address Book through the Arctrieval Edit Contact process. When Contact information is updated in Arctrieval, the Arctrieval User is prompted whether or not to update the information in the Filevine Medical Provider information in the Filevine Address Book.
 - d. Link existing Arctrieval Contact record with an existing Filevine Medical Provider in the Filevine Address Book.
 - e. Remove the link between Filevine Medical Provider information from Filevine Address Book and Arctrieval Contact record. Only an Arctrieval Attorney Firm Administrator or Arctrieval Attorney Firm User (with the appropriate permission) may break the connection.
3. Submit Record Requests from Filevine to Arctrieval
 - a. Any Filevine User can send a record request from Filevine to Arctrieval for processing by the attorney's medical record team.
 - b. Requests are reviewed by the attorney's medical record team in Arctrieval and released for delivery to the healthcare provider or covered entity.
4. Link existing Arctrieval Requests to an existing Filevine Project
 - a. If a request is started, created, and sent through Arctrieval, the request can be linked to an existing Filevine Project.
5. Data synchronization between Arctrieval and Filevine
 - a. All Arctrieval request activities are reported back to the request in Filevine.
 - b. All Arctrieval history entries are reported back to the request in Filevine
 - c. All documents created or uploaded in Arctrieval are uploaded to the request and project document folder in Filevine.

3. Document Change History

Date	Document Revision	Description of Changes
7/15/20223	1.0	Initial Document.
7/15/2023	1.1	Request expense field information added, notice for Arctrieval Client section added, notice about Filevine data validation for State in an address.
8/5/2023	1.2	Information about API Key access and Customs Editor Import/Export tool.
8/25/2023	1.3	Revised information about Scope requirements. Subscriptions: Read and Subscriptions: Update are needed.
11/15/2023	1.4	Added information for contact field support between Filevine organization contact type and Arctrieval Contact.
5/29/2024	1.5	Revised information on how to access Filevine keys, additional explanation about the Baseline and Custom Configurations, and document refinement.
3/20/2025	1.6	PAT Authentication setup instructions added. API Key setup instructions removed. Update to adding Arctrieval Department to Filevine
3/27/2025	1.7	Added information about Auto-move folder set up and configuring multiple Filevine Orgs
4/17/2025	1.8	Support for multiple Contact Types in Filevine. Mapping multiple Contact Types to Client and Contact records in Arctrieval.

4. Arctrieval Configuration

To enable Filevine and Arctrieval to communicate and exchange data, the following must occur:

1. Arctrieval activates the Integrations tab in the Arctrieval Settings for firms with a multiple-user subscription. The Filevine integration feature is only available to firms with a subscription for multiple users. Please get in touch with Arctrieval to activate the feature.
2. Obtain your Arctrieval FirmID to use as part of the integration configuration. Please get in touch with Arctrieval to for your unique Arctrieval FirmID.
3. Activate the Arctrieval Integration from the Integrations page on the Advance menu.
4. Create a Personal Access Token in Filevine.
5. On the Arctrieval Integration page, in the Settings menu, you must add a Personal Access Token.
6. Create a Subscription in Filevine for the Arctrieval integration.
7. The Arctrieval fields are added to Filevine Project templates by importing the pre-configured sections or manually entering the data fields into an existing section. Two options enable Arctrieval usage in multiple Filevine project templates.
 - a. The Arctrieval Client and Arctrieval Request section files (ArctrievalClient.fvst and ArctrievalRequest.fvst) must be imported into a Filevine Project template for the baseline configuration.
 - b. Required Arctrieval data fields must be added to an existing section in a Filevine project template that will be used to submit requests and mapped to Arctrieval for the custom configuration. The same Section Selector and Field Selector values must be used across all the Filevine project templates.

5. Existing Integrations—Updating to Personal Access Token

For existing customers using a dedicated API key for their API credentials, the Arctrieval Attorney Firm Administrator will see the following page when clicking on the Integrations tab in the Settings menu. The process for replacing the API key with a Personal Access Token is the same for a new integration.

Click the Update Filevine Access Token to start the process and follow the directions below.

The screenshot shows the Arctrieval Settings page for 'Spencer & Smith'. The 'Integrations' tab is selected. At the top, there are several buttons: 'ENABLE ADDITIONAL CONTACT FIELD', 'RESET MAPPING', 'UPDATE FILEVINE ACCESS TOKEN' (highlighted with an orange arrow), 'UPDATE FILEVINE API KEY', 'TEST FILEVINE LINK', 'REMOVE FILEVINE API KEY', and 'ADD CONTACT TYPE'. Below these buttons is the 'FILEVINE INTEGRATION' section with the following details:

- API Key: fvpk..._6a039
- API Secret: fvsik..._0f9d3
- Base Filevine URL: https://sandbox.api.filevineapp.com/
- Last Updated On: 05/13/2024
- Is Filevine Contact Additional Fields Used: No

Below the integration details is a table with 'Sections and Fields' and 'Contact Types' tabs. The 'Sections and Fields' tab is active, showing a table with columns: 'Filevine Section Selector', 'Filevine Field Selector', 'Arctrieval Section', and 'Arctrieval Field Name'. The table contains 12 rows of integration fields, each with an 'EDIT' button.

An orange text box with an arrow pointing to the 'UPDATE FILEVINE ACCESS TOKEN' button contains the following text: "Option for existing customers to update authentication API Credentials from API keys to Personal Access Tokens."

Once you configure Arctrieval's integration using a Personal Access Token, you cannot go back to using an API key.

5.1. Establishing the Link Between Filevine and Arctrieval

Once the Filevine and Arctrieval integration is enabled, the Arctrieval Attorney Firm Administrator will see the Integrations Tab on the Settings menu, as shown in the image.

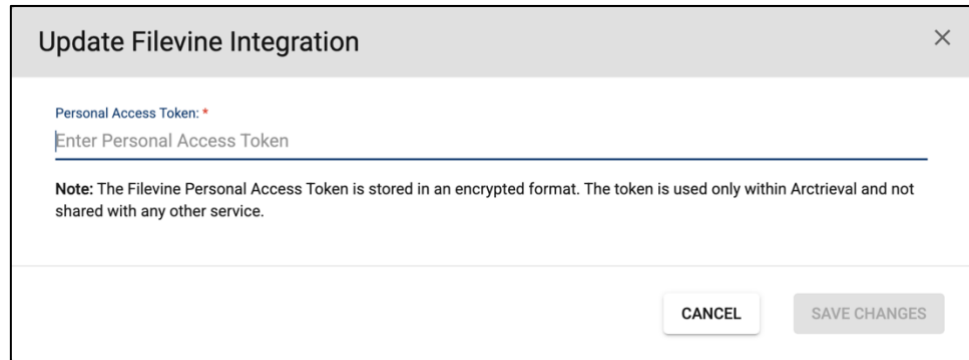

The screenshot shows the Arctrieval Settings page for 'Spencer & Smith'. The 'Integrations' tab is selected and highlighted with an orange arrow. The 'UPDATE FILEVINE ACCESS TOKEN' button is visible. Below the buttons is the 'FILEVINE INTEGRATION' section with the following details:

- Personal Access Token: No value is present.

Below the integration details is a table with 'Sections and Fields' and 'Contact Types' tabs. The 'Sections and Fields' tab is active, showing a table with columns: 'Filevine Section Selector', 'Filevine Field Selector', 'Arctrieval Section', and 'Arctrieval Field Name'. The table is currently empty.

Clicking the Update Filevine Access Token button displays the dialog box in the image.

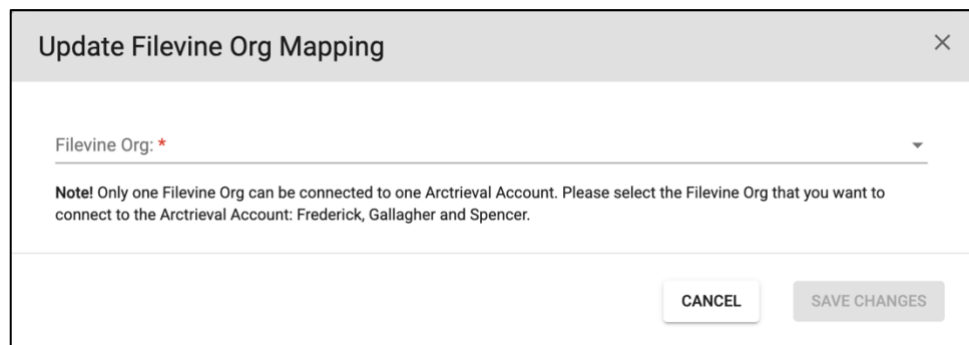

The Personal Access Token is available through your Filevine account.

The dialog box titled "Update Filevine Integration" has a close button (X) in the top right corner. It contains a label "Personal Access Token: *" followed by a text input field with the placeholder text "Enter Personal Access Token". Below the input field is a note: "Note: The Filevine Personal Access Token is stored in an encrypted format. The token is used only within Arctrieval and not shared with any other service." At the bottom right, there are two buttons: "CANCEL" and "SAVE CHANGES".

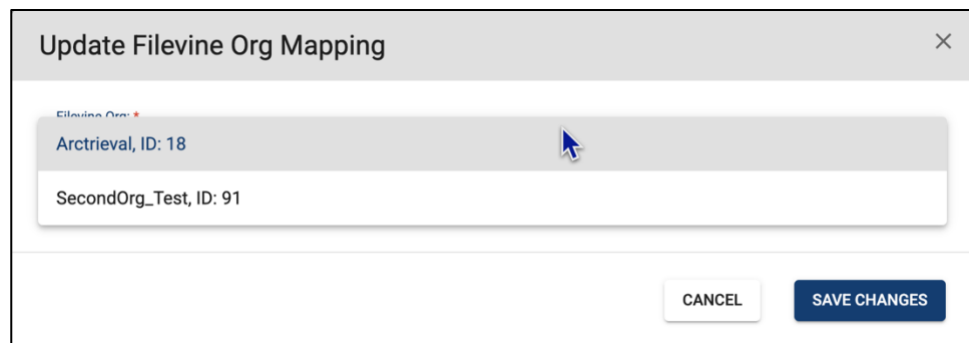

5.2. Filevine Org Mapping (Optional)

Each Arctrieval account can only be linked to one Filevine Org. If your Filevine Account has multiple Orgs, you must choose which organization to connect with your Arctrieval account. As part of the integration setup, the following dialog box is displayed if Arctrieval detects more than one Org in your account.

The dialog box titled "Update Filevine Org Mapping" has a close button (X) in the top right corner. It contains a label "Filevine Org: *" followed by a dropdown menu. Below the dropdown is a note: "Note! Only one Filevine Org can be connected to one Arctrieval Account. Please select the Filevine Org that you want to connect to the Arctrieval Account: Frederick, Gallagher and Spencer." At the bottom right, there are two buttons: "CANCEL" and "SAVE CHANGES".

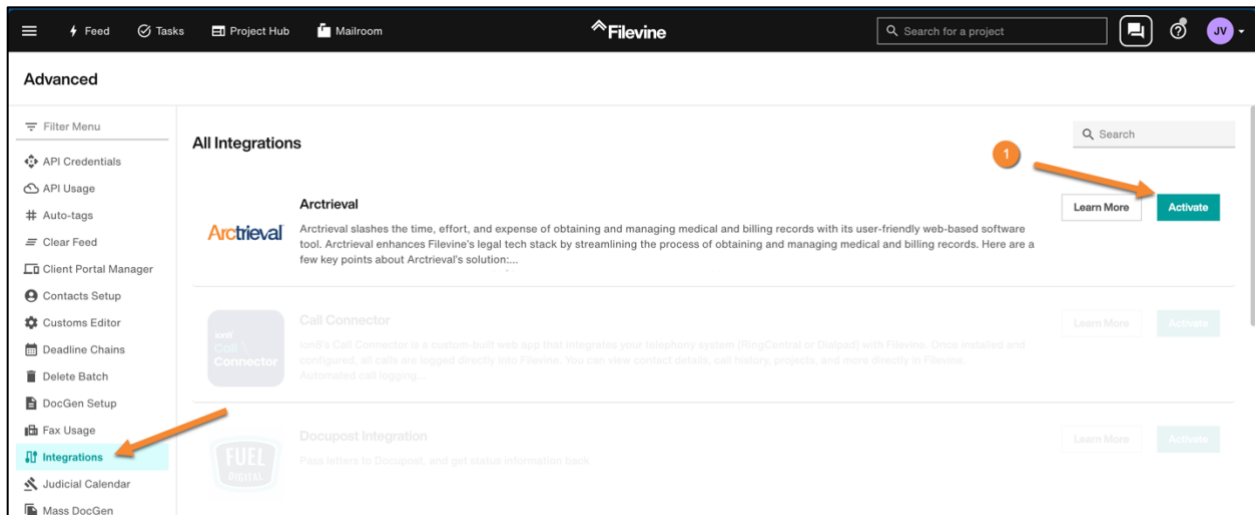

Select the Filevine Org from the dropdown list and click the Save Changes button.

The dialog box titled "Update Filevine Org Mapping" has a close button (X) in the top right corner. It contains a label "Filevine Org: *" followed by a dropdown menu. The dropdown menu is open, showing two options: "Arctrieval, ID: 18" and "SecondOrg_Test, ID: 91". A mouse cursor is pointing at the "Arctrieval, ID: 18" option. At the bottom right, there are two buttons: "CANCEL" and "SAVE CHANGES".

6. Activating New Arctrieval Integration

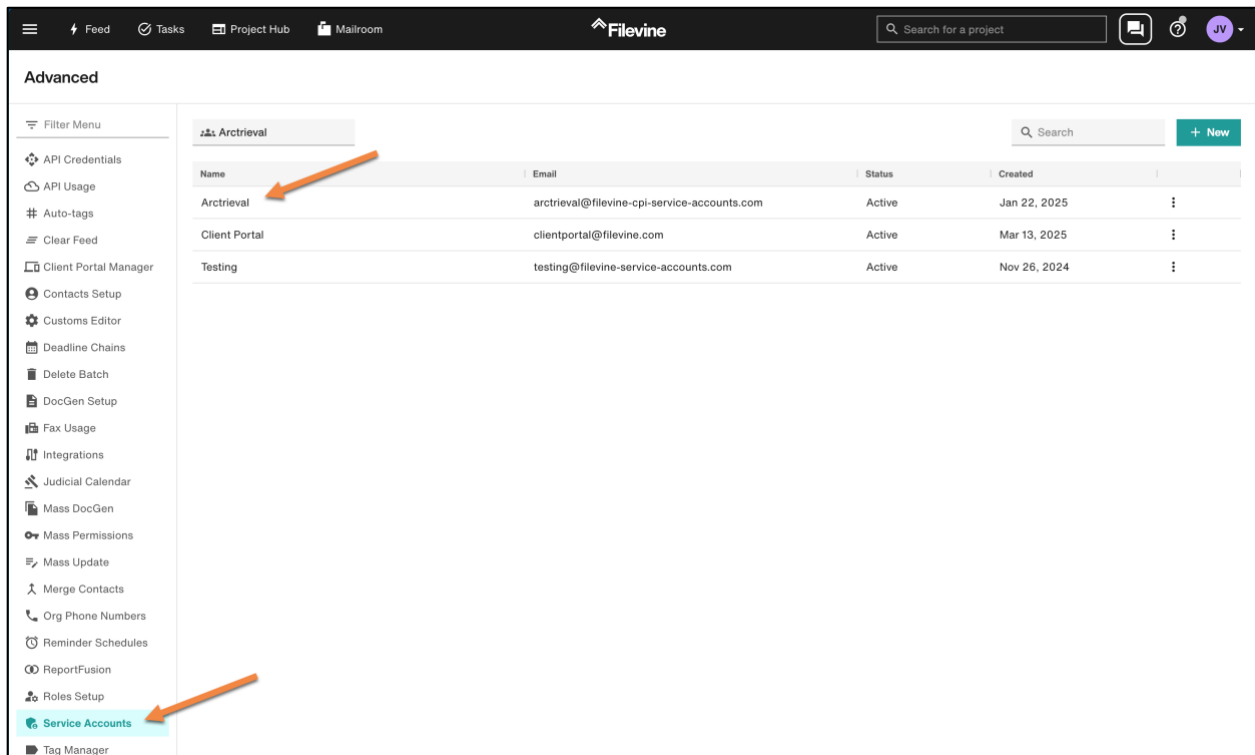

Sign in to your Filevine account and navigate to the Integrations section in the Advanced menu. If you do not see the Integrations tab, you must get additional permissions for your Filevine User Account or have your firm's Filevine Administrator continue the process.

1. Click Activate to enable the Arctrieval integration with Filevine.

6.1. Verify Arctrieval Integration

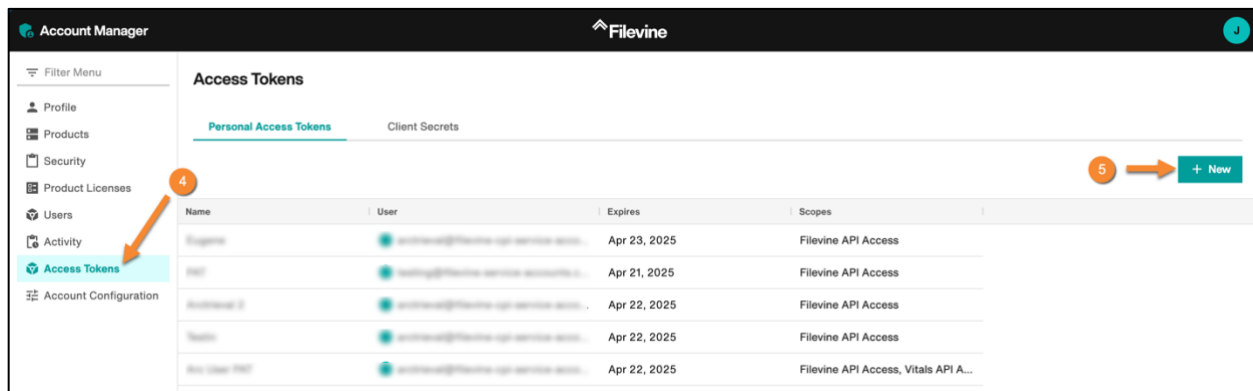

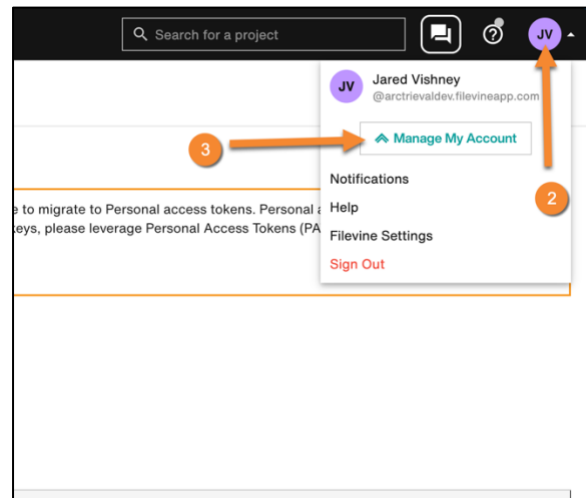

Navigate to the Service Accounts section in the Advanced menu, and you should see an account named Arctrieval, as shown in the image.

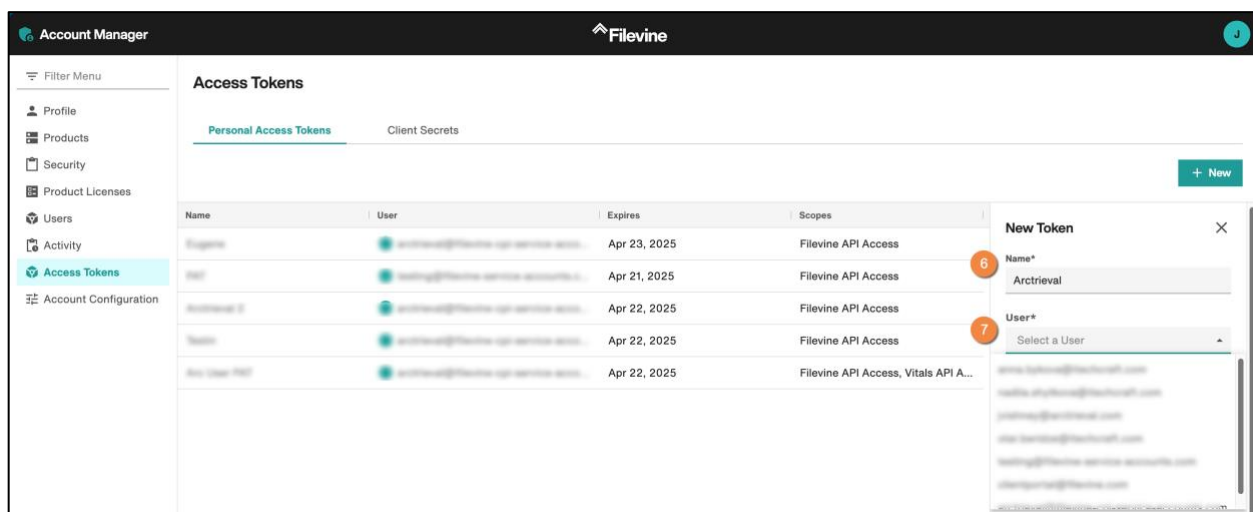

6.2. Create and Enter Personal Access Token

You will now need to navigate to the Account Manager page.

2. Clicking on your user button in the upper right corner of the Filevine Application
3. Clicking on Manage My Account

4. Click on Access Tokens in the Account Manager menu.
5. Click on + New.

6. Enter a Name for the Token
7. Select a User from the list for the Token

6.3. Filevine Org Mapping (Optional)

Each Arctrieval account can only be linked to one Filevine Org. If your Filevine Account has multiple Orgs, you must choose which organization to connect with your Arctrieval account. As part of the integration setup, the following dialog box is displayed if Arctrieval detects more than one Org in your account.

The dialog box is titled "Update Filevine Org Mapping" and has a close button (X) in the top right corner. It contains a dropdown menu labeled "Filevine Org: *". Below the dropdown is a note: "Note! Only one Filevine Org can be connected to one Arctrieval Account. Please select the Filevine Org that you want to connect to the Arctrieval Account: Frederick, Gallagher and Spencer." At the bottom right, there are two buttons: "CANCEL" and "SAVE CHANGES".

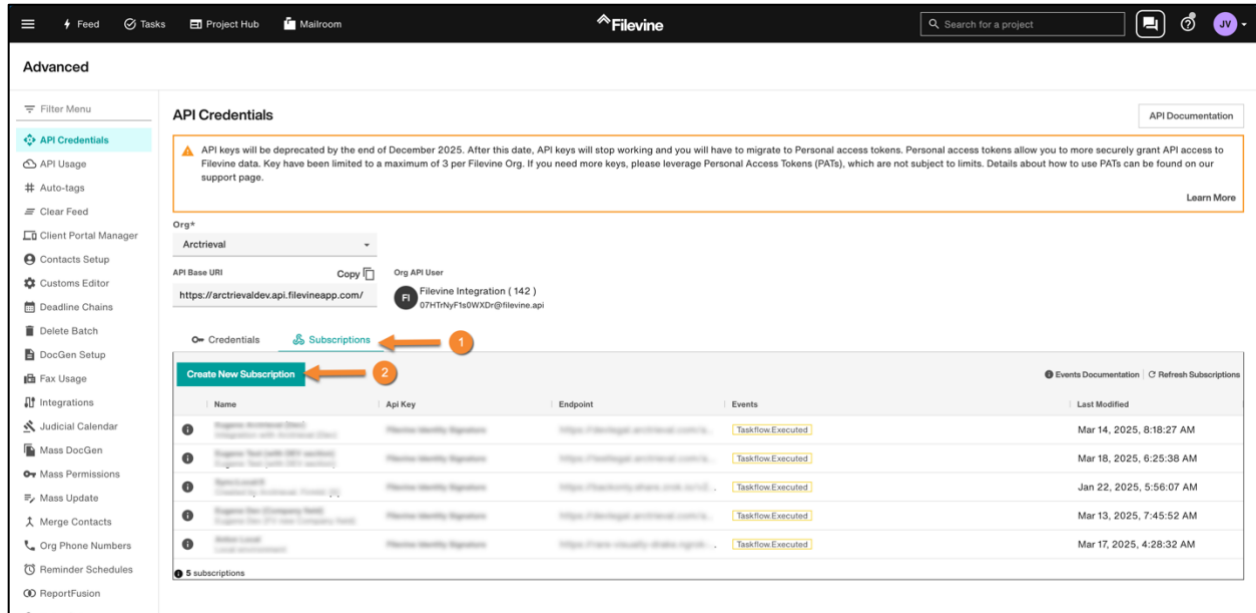

Select the Filevine Org from the dropdown list and click the Save Changes button.

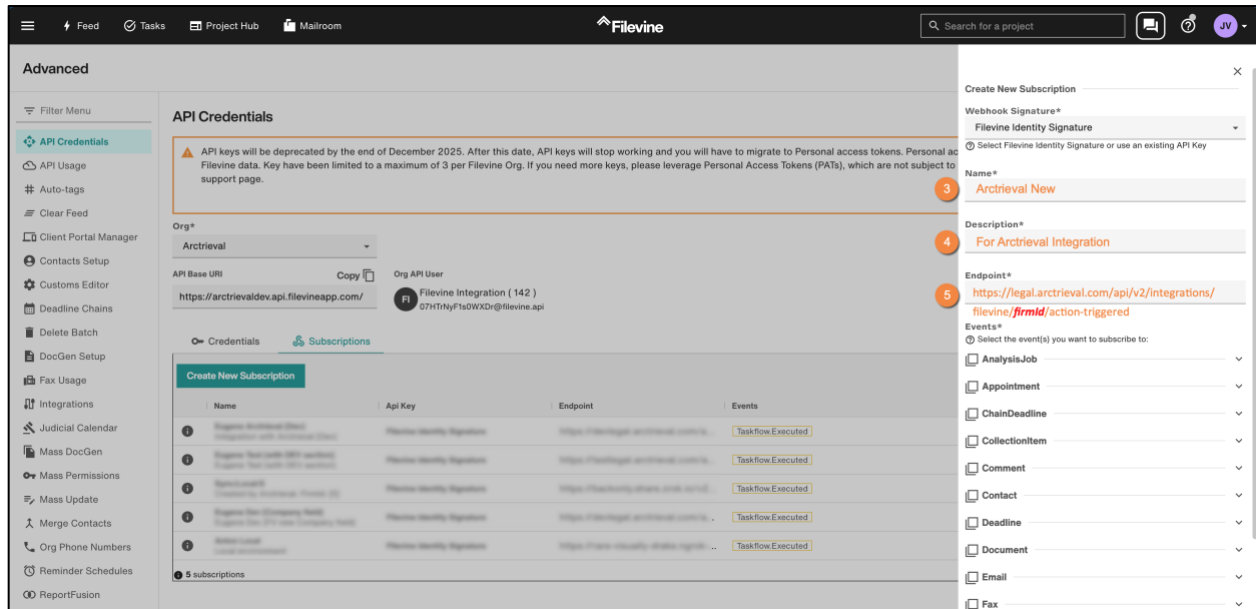

The dialog box is titled "Update Filevine Org Mapping" and has a close button (X) in the top right corner. The dropdown menu labeled "Filevine Org: *" is open, showing two options: "Arctrieval, ID: 18" and "SecondOrg_Test, ID: 91". A mouse cursor is pointing at the "Arctrieval, ID: 18" option. At the bottom right, there are two buttons: "CANCEL" and "SAVE CHANGES".

7. Configuring Subscriptions in Filevine

Navigate to the API Credentials section in the Advanced menu, and you should see the following image.

1. Click on the Subscriptions tab.
2. Click the Create New Subscription button.

3. Enter a Name for the Subscription.
4. Enter a Description for the Subscription.
5. Enter the Endpoint URL using the following structure:
https://legal.arctrieval.com/api/v2/integrations/filevine/***firmld***/action-triggered.

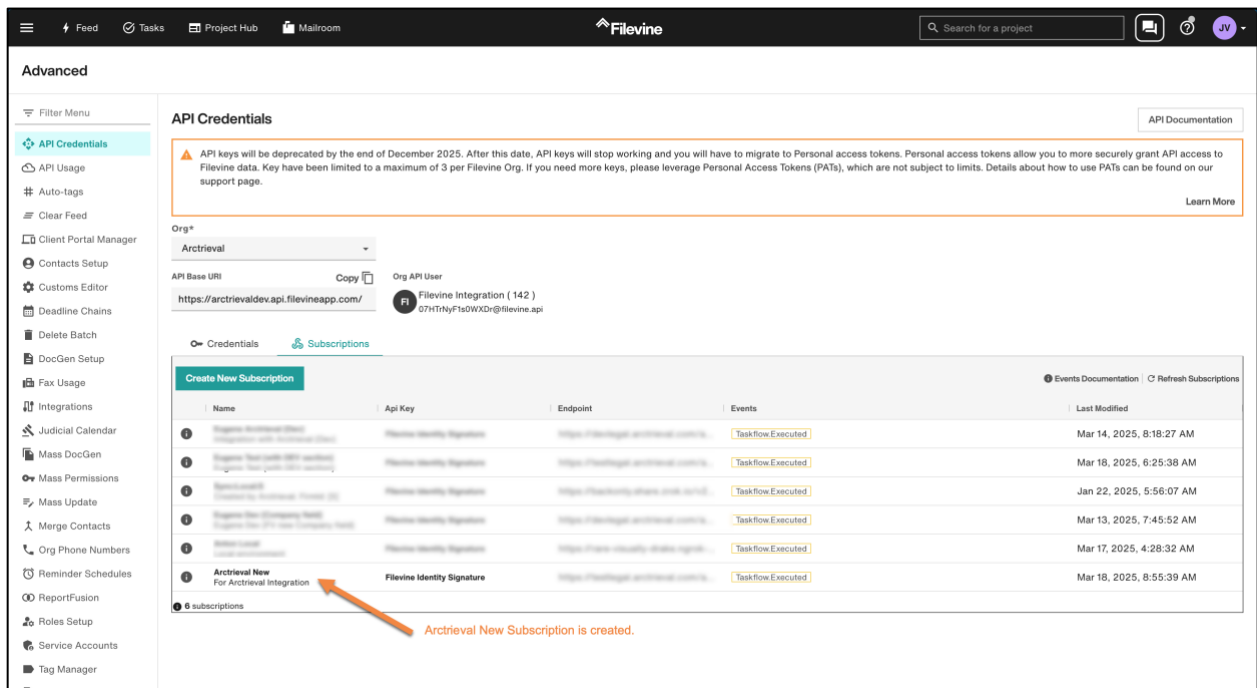

The ***firmld*** value is your Arctrieval ID for your account. You will need to contact Arctrieval support to get this value.

Arctriever <> Filevine Integration Setup Guide

6. Scroll down the Events list to the Taskflow item and open the dropdown.
7. Click the button to enable Executed
8. Click the Create button.

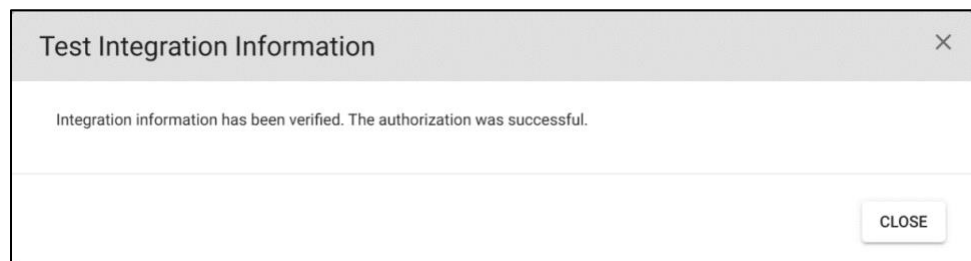

After clicking Create, the following web page in the image is displayed.

7.1. Test Filevine Link

Clicking the Test Filevine Link button verifies that Arctriever can communicate with the Filevine account based on the provided Personal Access Token and subscription. If the test is successful, the dialog box is displayed, as shown in the image.

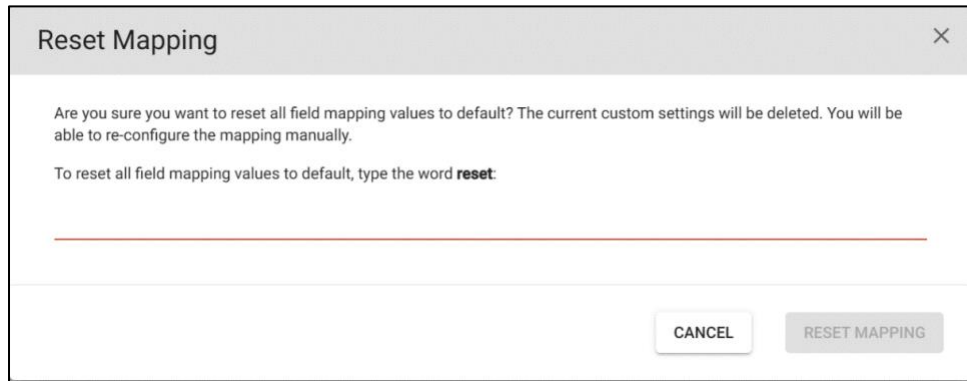

If the test fails, please start troubleshooting the issue by updating the Personal Access Token entered into Arctriever and testing the Filevine Link.

7.2. Reset Mapping

Clicking the Reset Mapping button displays the dialog box shown in the image.

The Reset Mapping function resets custom values entered as the Filevine Section Sector and Filevine Field Selector to the Arctrieval default values. Once the values are reset, it cannot be undone.

A dialog box titled "Reset Mapping" with a close button (X) in the top right corner. The main text asks: "Are you sure you want to reset all field mapping values to default? The current custom settings will be deleted. You will be able to re-configure the mapping manually." Below this, it says: "To reset all field mapping values to default, type the word **reset**:" followed by a red horizontal line for text input. At the bottom right are two buttons: "CANCEL" and "RESET MAPPING".

Any custom values must be re-entered into Arctrieval. To reset the values to default, type the word reset as indicated and click the Reset Mapping button.

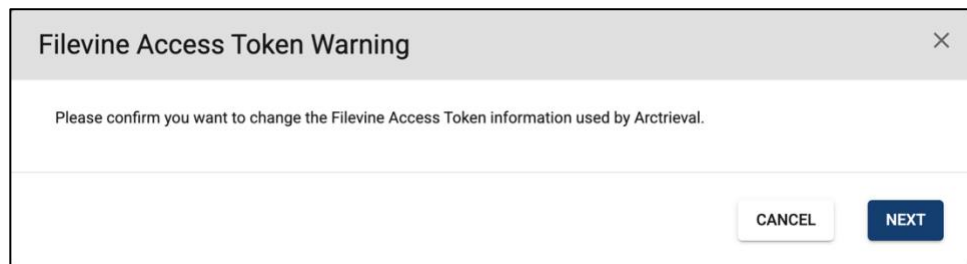

Once the values are reset, they cannot be undone. Any custom values must be re-entered into Arctrieval.

7.3. Update Filevine Access token

If a valid connection between Filevine and Arctrieval exists, clicking the Update Filevine Access Token button displays the dialog box in the image.

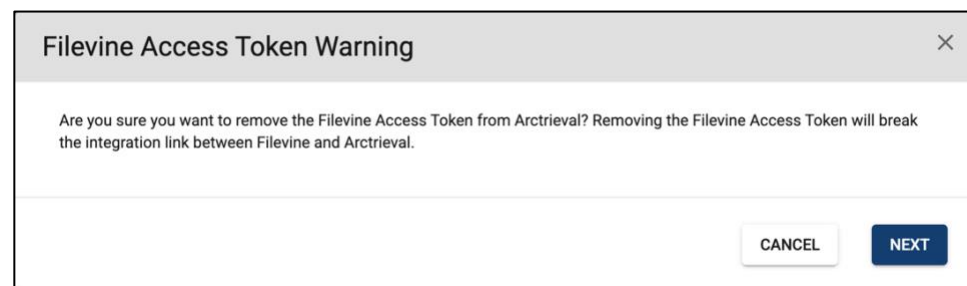

Clicking the Next button displays the Update Filevine Access Token dialog box. This should only be used if there was an error in the original values when the link between Filevine and Arctrieval was first established or if the Filevine account is migrating to a new instance.

A dialog box titled "Filevine Access Token Warning" with a close button (X) in the top right corner. The main text says: "Please confirm you want to change the Filevine Access Token information used by Arctrieval." At the bottom right are two buttons: "CANCEL" and "NEXT".

7.4. Remove Filevine Access Token

Clicking the Remove Filevine Access Token button displays the Filevine Access Token Warning dialog box, as shown in the image.

To continue, press the Next button, which will display the Confirm Filevine Access Token dialog box, as shown in the image.

A dialog box titled "Filevine Access Token Warning" with a close button (X) in the top right corner. The main text asks: "Are you sure you want to remove the Filevine Access Token from Arctrieval? Removing the Filevine Access Token will break the integration link between Filevine and Arctrieval." At the bottom right are two buttons: "CANCEL" and "NEXT".

Clicking the Remove Filevine Access Token button will break the integration link between Filevine and Arctrieval.

Confirm Filevine Access Token Removal

Press Remove Access Token, to remove the Filevine Access Token from Arctrieval.

Press Cancel, to stop the process.

Removing the Filevine Access Token will break the integration link between Filevine and Arctrieval.

CANCELREMOVE ACCESS TOKEN

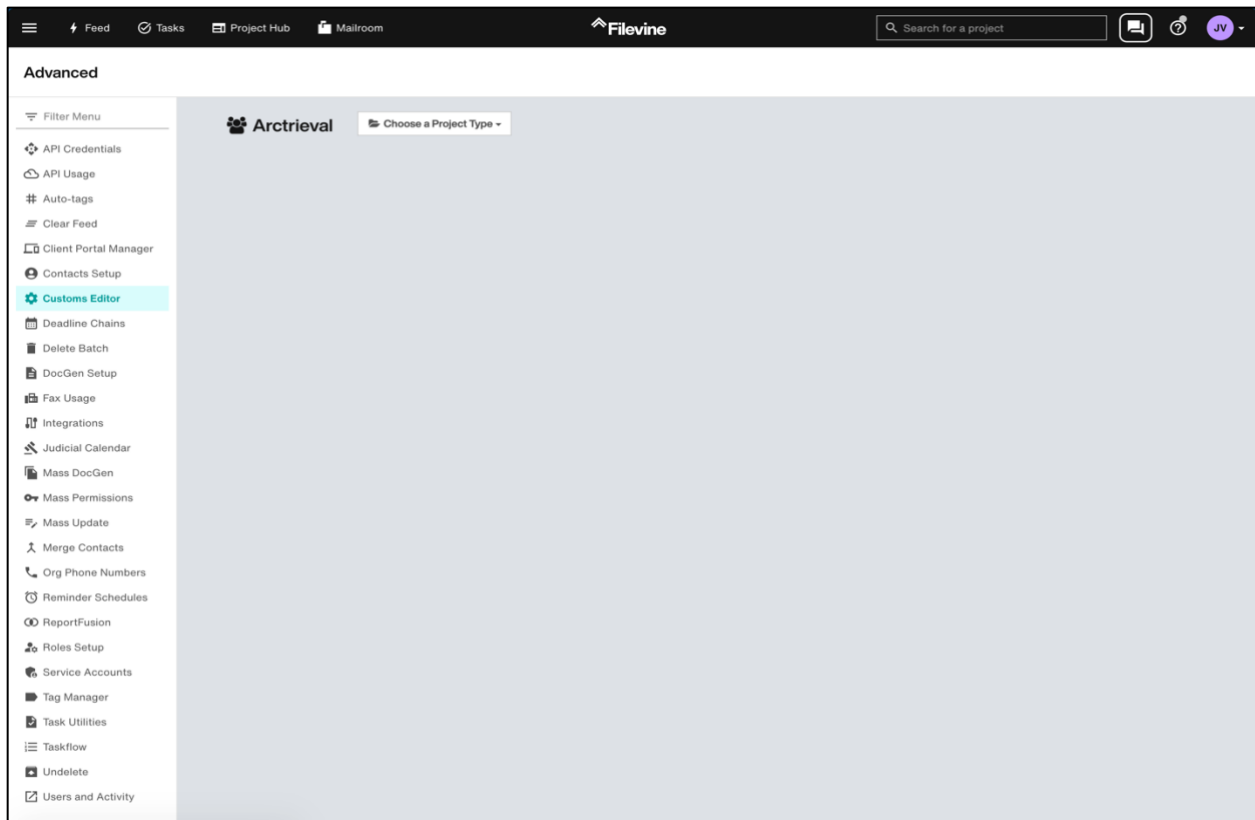

8. Standard Project Template Configuration

To move data between Filevine and Arctrieval, data fields must be added to sections for a Filevine Project Template and mapped to the appropriate data fields in Arctrieval. The Firm Filevine Administrator adds the necessary data fields and modifies the Filevine Account.

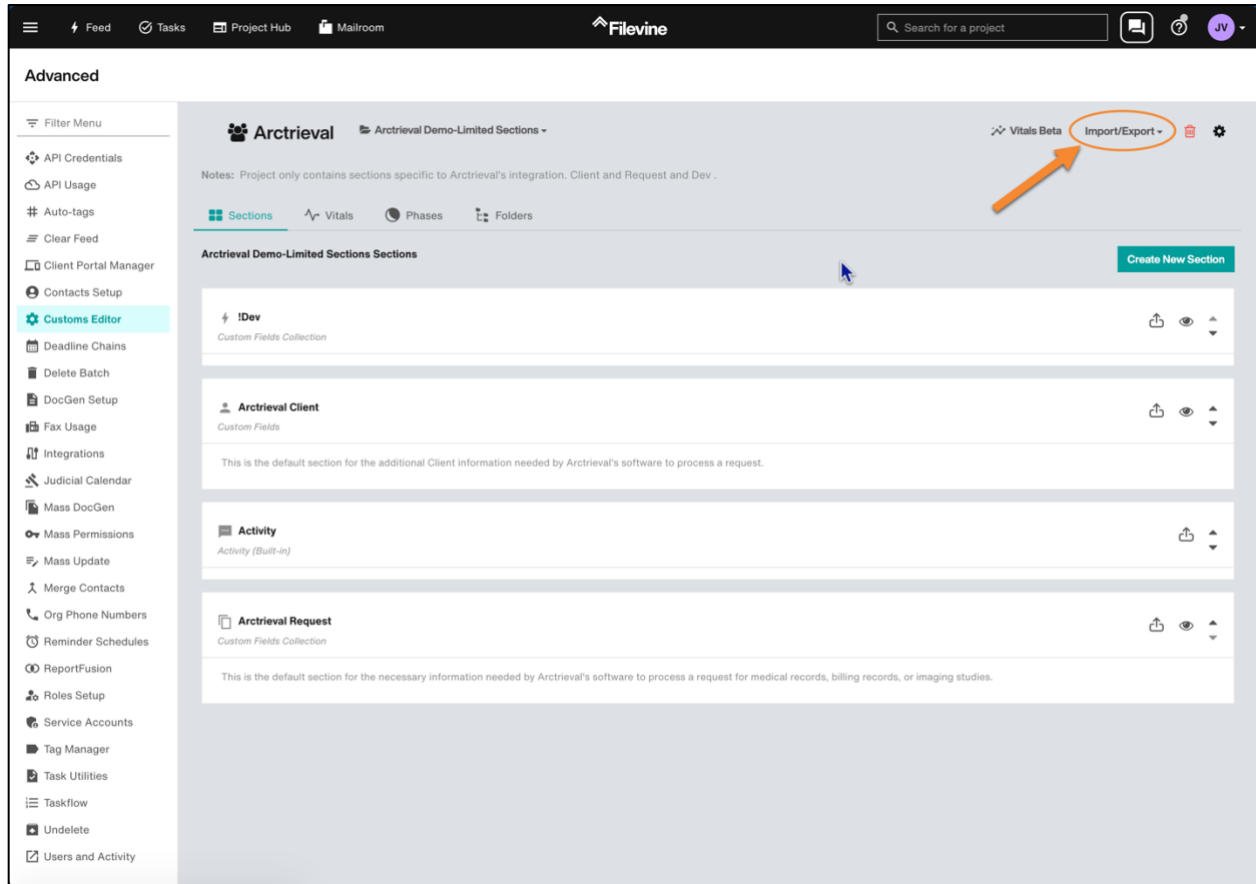

8.1. Importing Standard Arctrieval Sections

To use the default mapping settings, the ArctrievalClient.fvst, and ArctrievalRequest.fvst files must be imported into at least one Filevine Projects template. They may be imported into every Filevine Project template where records are needed for the case or claim. The following will walk you through the steps to import the files.

1. Log into your Filevine account. The account must have permission to edit sections of a Filevine project.
1. Go to the Advanced page.
2. In the left-hand menu, select Customs Editor. If you do not see the Advanced page or Customs Editor menu options, contact your Filevine system administrator or Filevine support to gain access to the necessary Filevine Functionality.
3. In the Choose a Project Type drop-down list, select the Project Type where you want to add the integration with Arctrieval.
4. Select Import Sections into: '<Selected Project Type>' from the Import/Export drop-down list. as shown in the image.

5. Click the Choose Import File button and select a file with the .fvst extension. The step must be done for the ArctrievalClient.fvst and ArctrievalRequest.fvst files.
6. As shown in the image, the Arctrieval Client and Arctrieval Request sections are added to the Project section list after importing the configuration files. The Arctrieval Client and Arctrieval Request are used to gather information to submit Record Requests from Filevine to Arctrieval.

If you do not see the Import/Export tool as part of the Customs Editor in your Filevine account, you must contact Filevine Support or your Filevine Account Manager to enable the tool.

Alternatively, you can provide the .fvst files to Filevine and ask them to import the Arctrieval Client and Arctrieval Request sections.

If you still need assistance, please contact Arctrieval Support, and we can introduce you to a Filevine Consulting partner.

9. Additional Contact Field Used for Organizations (Optional)

Arctrieval can manage information about the department for a Medical Provider Contact in the Filevine Address Book when the contact in Filevine is an organization and not an Individual. When you select an organization as the contact in Filevine, there is no default location to store information about a department.

Enabling the Additional Contact Field Option and adding a field to the Contact Card will cause Arctrieval to synchronize the Department name for an Arctrieval Contact on the Filevine contact card.

The second image displays the information for the “Billing and Medical Records” department synchronized between Arctrieval and Filevine.

An additional field is added to the field mapping table, as shown in the image.

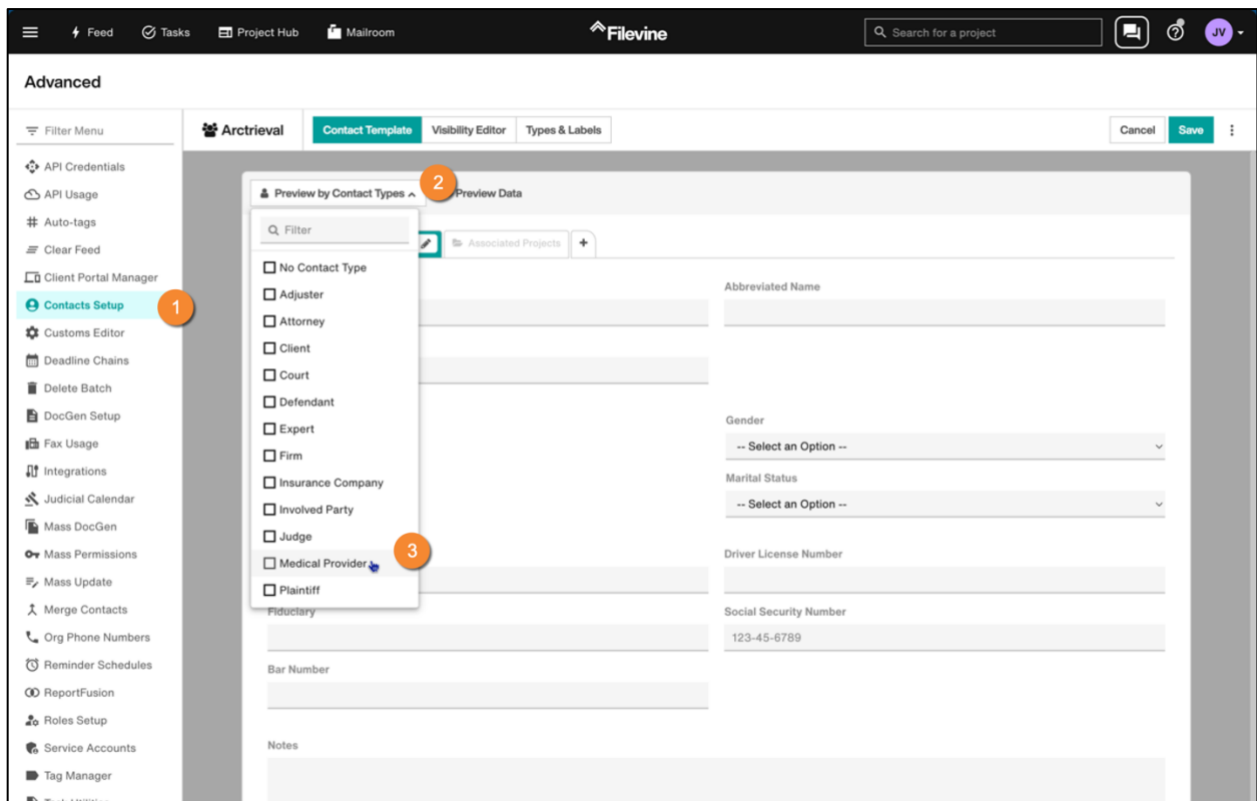

The field has the following default properties:

7. Filevine Field Selector is arctrievalDepartment
8. Arctrieval Section is Contact
9. Arctrieval Field Name is Department

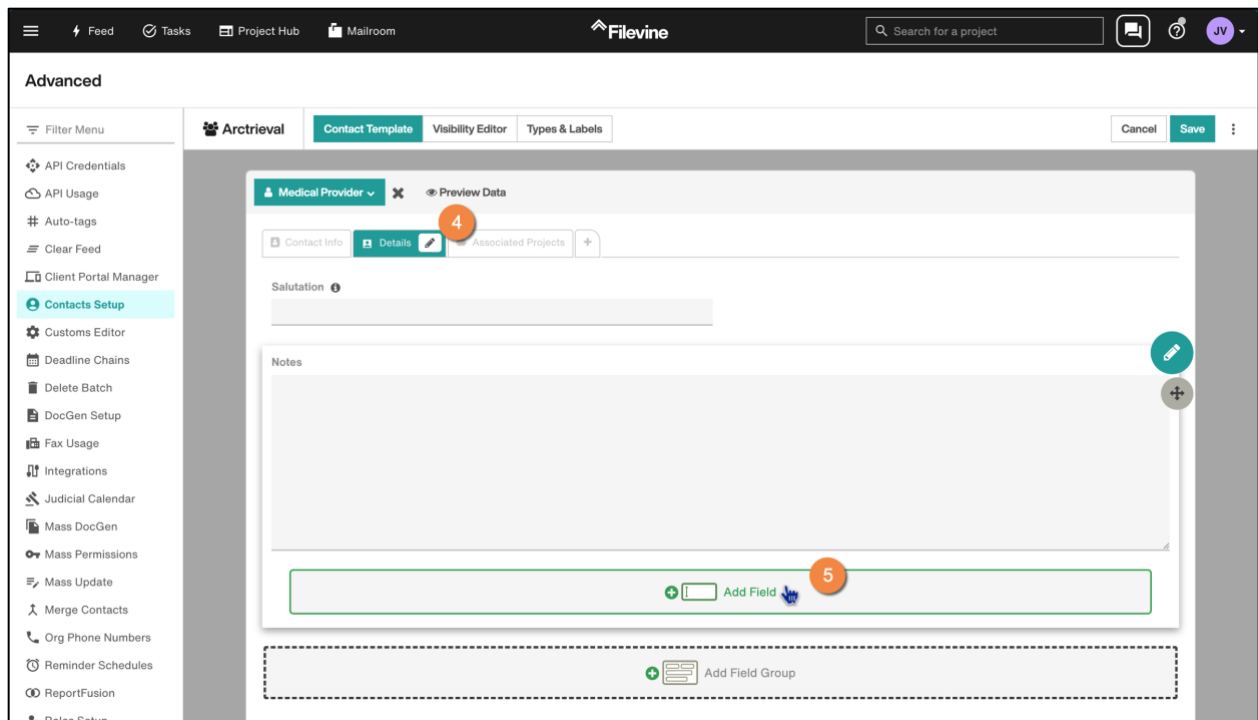

If you already have a field for a Medical Provider Department on the Contact Card, you can change the Filevine Field Selector value by clicking the Edit button and entering the existing value.

9.2. Adding Department Field to Filevine

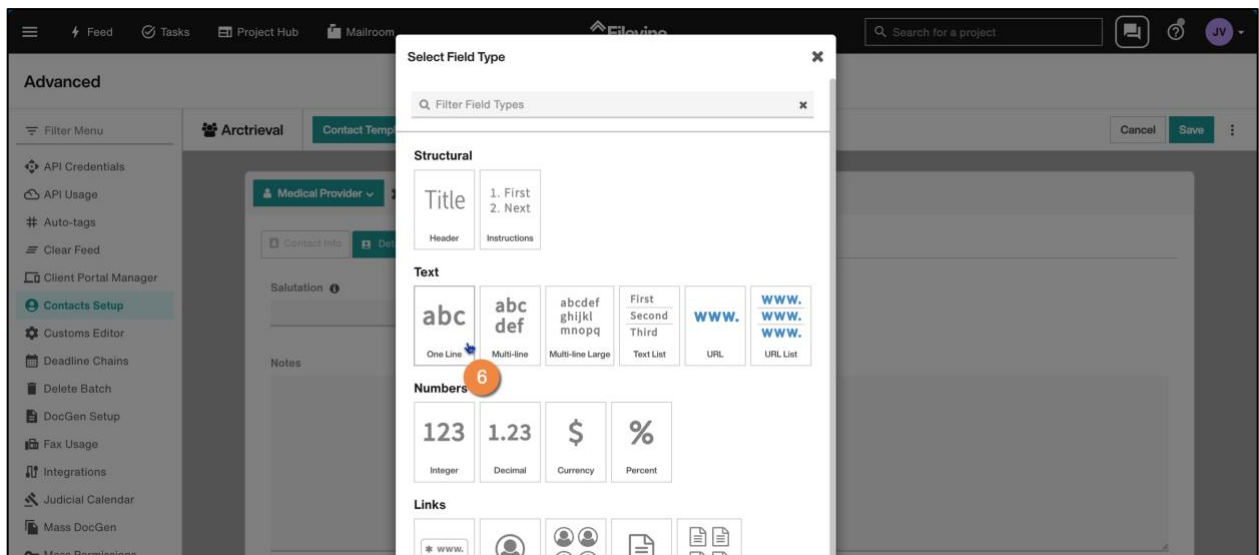

Sign in to your Filevine account and navigate to the Contacts Setup tab in the Advanced menu. If you do not see the Contacts Setup menu you will need to get additional permissions for your Filevine User Account or have your firm's Filevine Administrator complete the following steps.

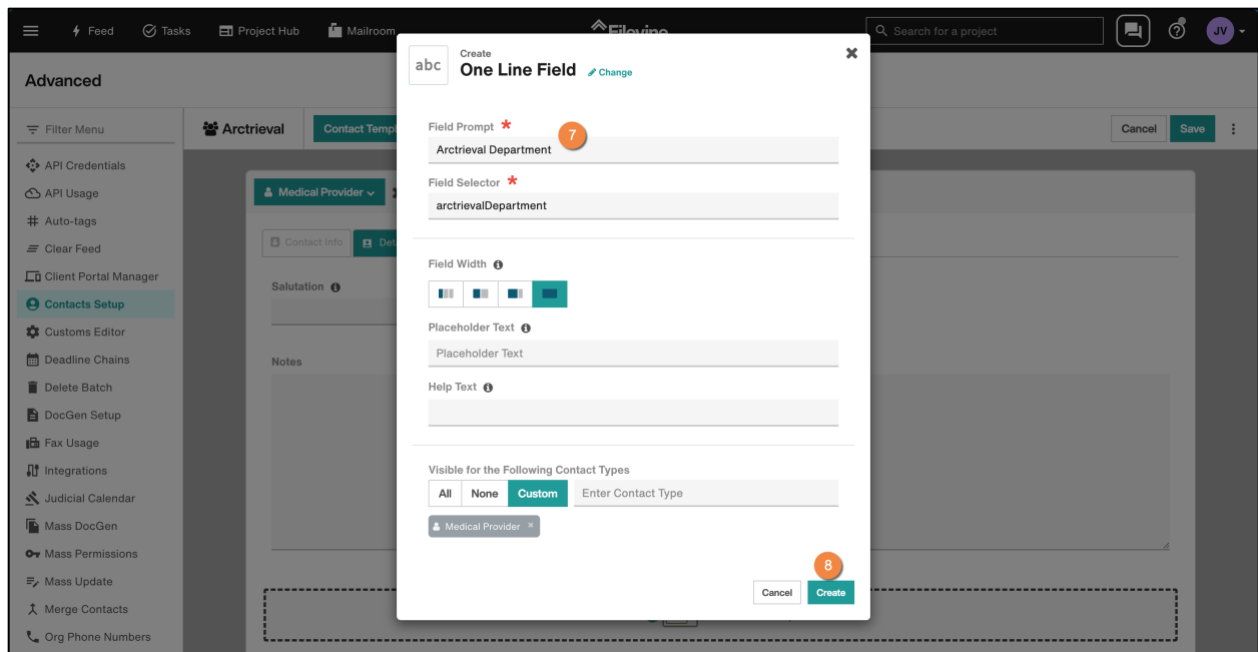

1. Navigate to the Contacts Setup menu.
2. Click on the Preview by Contact Types dropdown list.
3. Check the box next to Medical Provider.

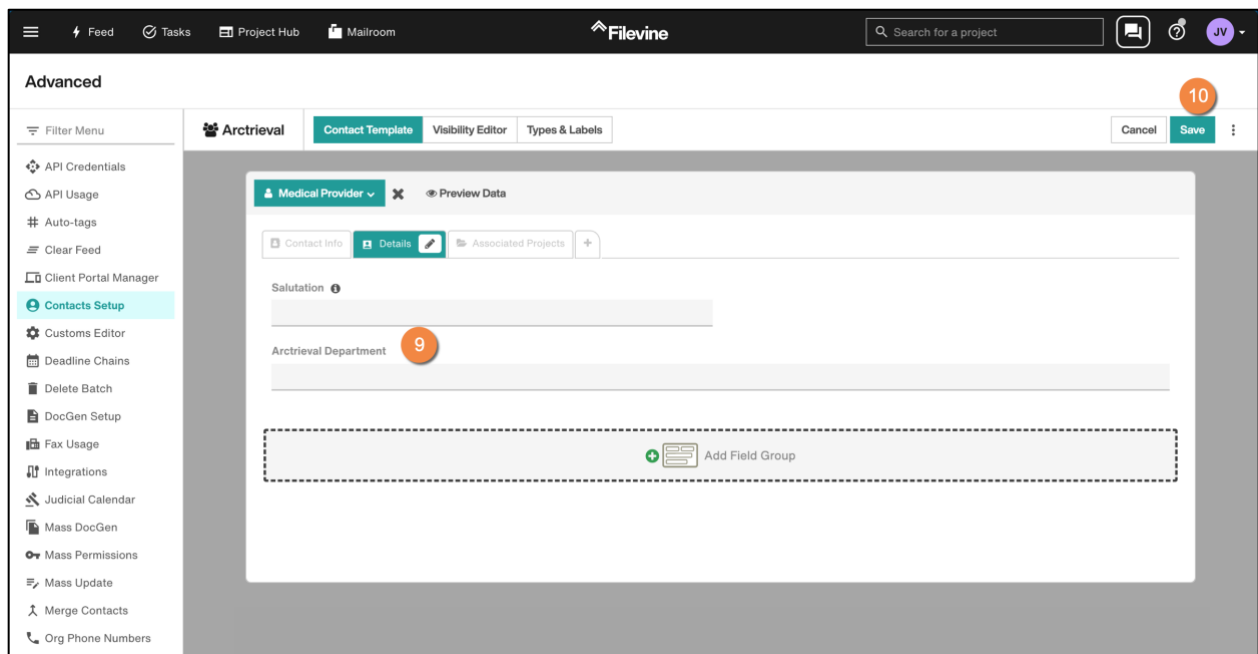

4. Click on the Details tab or another tab where you want to place information specific to Medical Provider Contacts.
5. Click on Add Field

6. Select Text – One Line as the Field Type

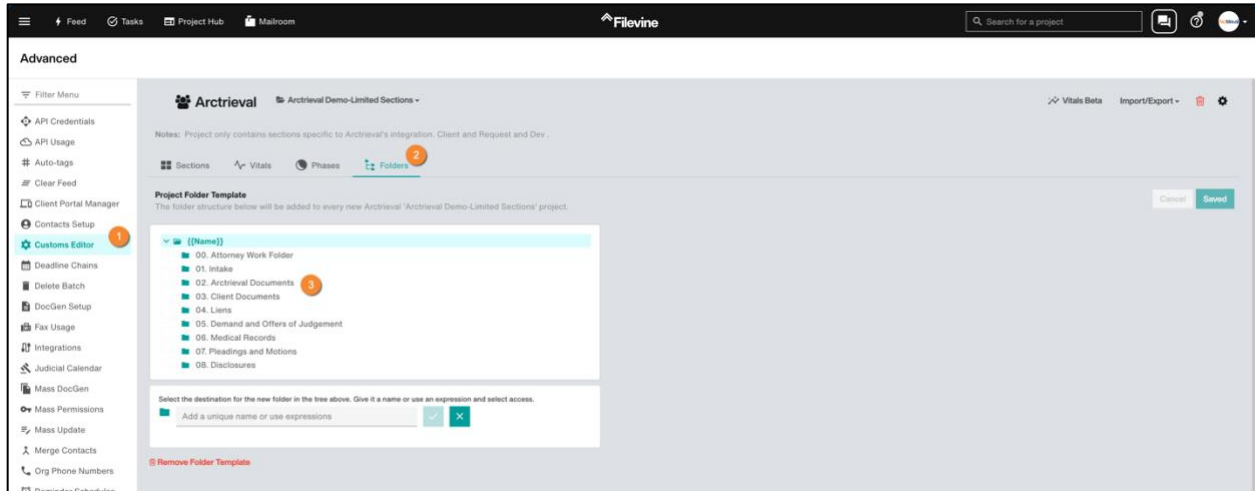

7. Enter Arctrieval Department as the Field Prompt. Filevine will automatically create the Field Selector as arctrievalDepartment. If you change the Field Selector value, you will need to enter the new value into the Arctrieval mapping table.
8. Click the Create Button.

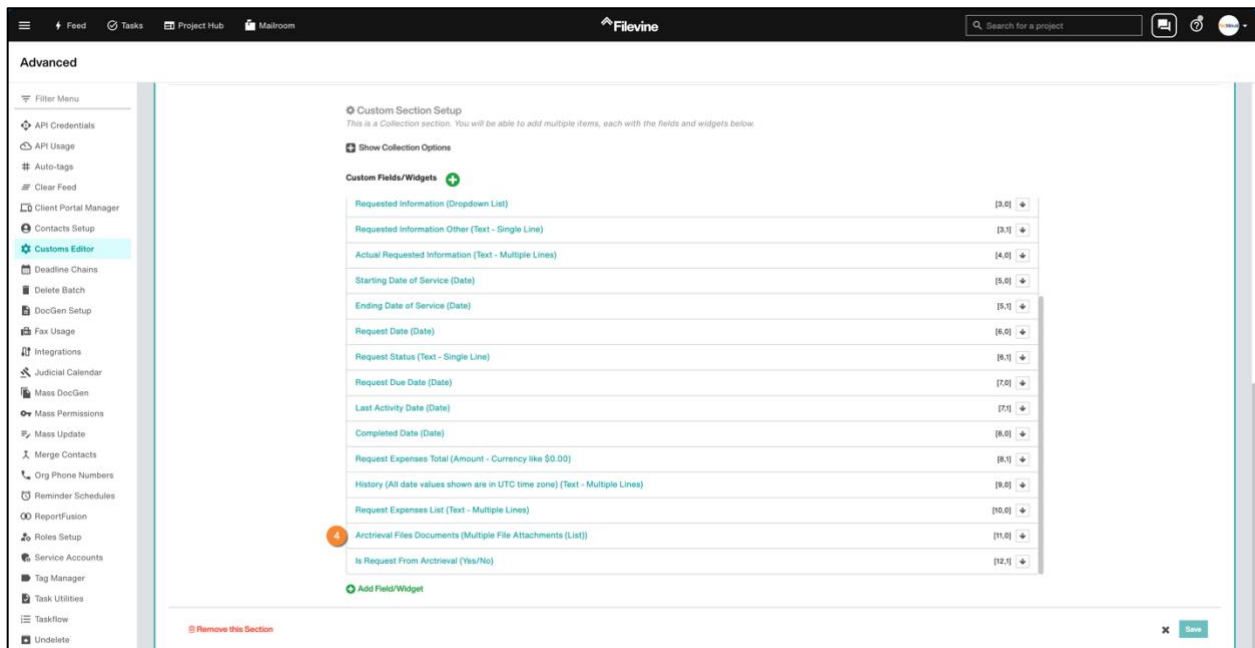

9. The Arctrieval Department field now appears on the Contact form.
10. Press Save to store the changes to your Filevine account.

10. Document Folder Configuration (Optional)

By default, Arctrieval will save all documents from your Arctrieval account into the main Documents Folder. If you want Arctrieval to automatically save the files into a specific folder, follow the directions below. Start by navigating to the Advanced menu as shown in the image.

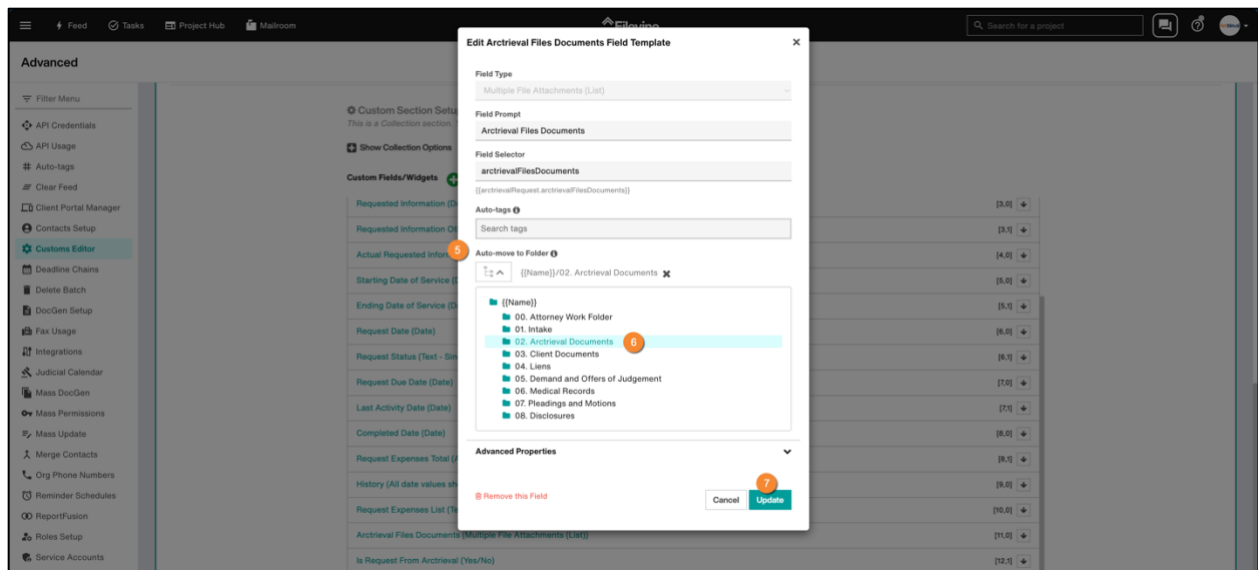

1. Click on the Customs Editor
2. Click on the Folders tab.
3. Create a folder called Arctrieval Documents. This is optional. If you want to store the documents in an existing folder, there is no need to create a new folder.

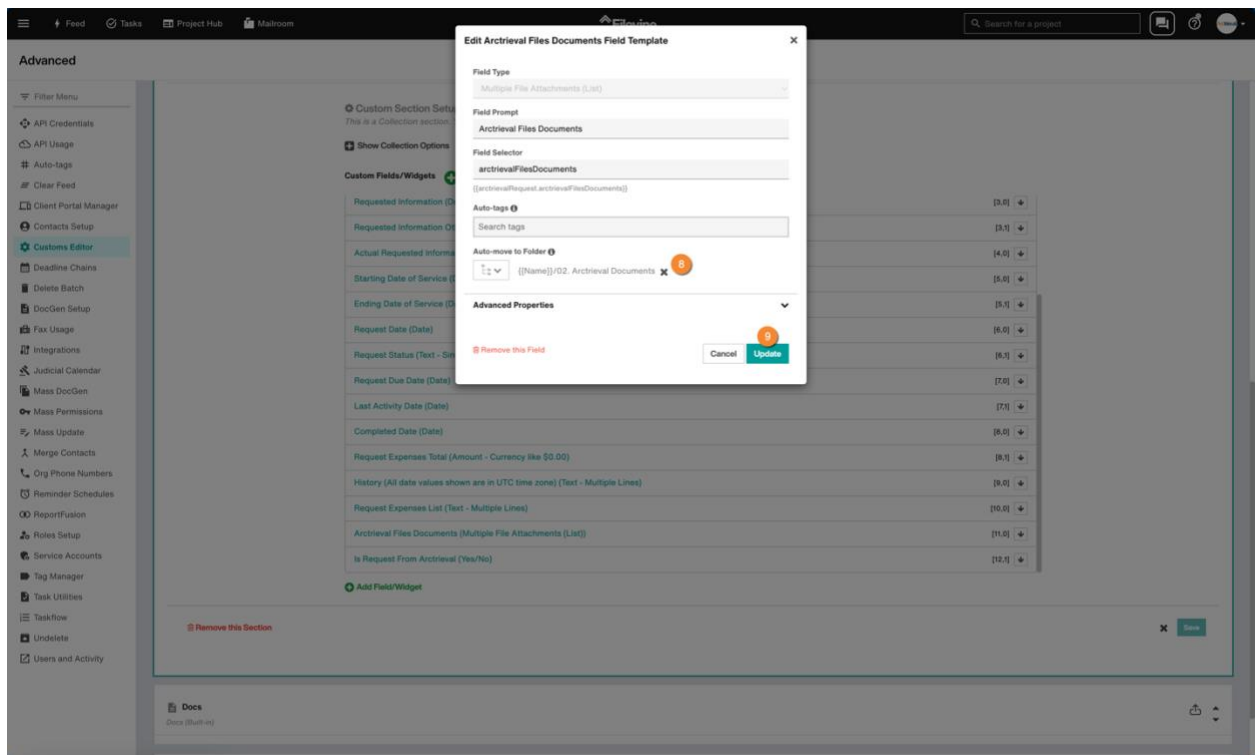

4. Click on the Sections tab in the Customs Editor, navigate to the Arctrieval Request section, expand the Custom Fields/Widgets, and scroll down to the Arctrieval File Documents (Multiple File Attachments (List)).

Arctrieval <> Filevine Integration Setup Guide

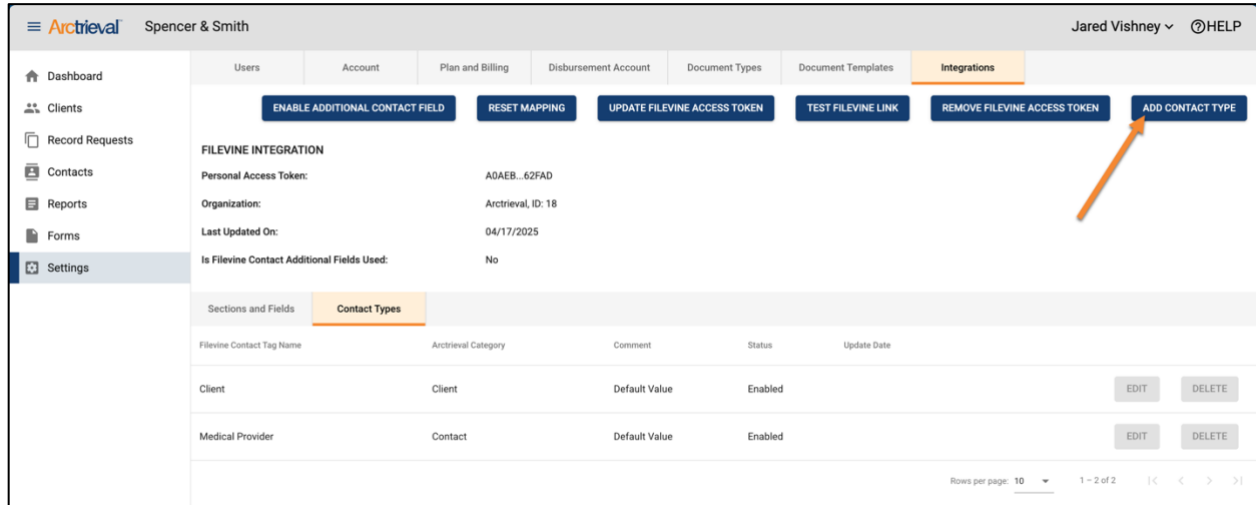

5. Click the down arrow in the Auto-move to Folder dropdown to show the list of available folders.
6. Click on the folder where you want Arctrieval to save the documents sent from Arctrieval to the Filevine project
7. Click on Update to save the changes.

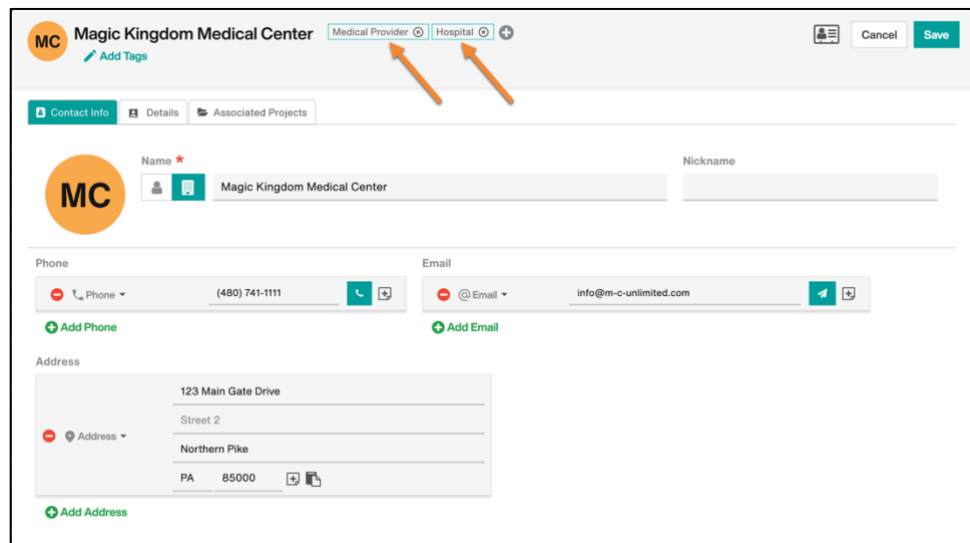

8. The document folder path for the Auto-move to Folder is now displayed.
9. Click on update again to close the dialog box.

11. Additional Contact Types Configuration (Optional)

When importing a Client or Contact from Filevine into Arctriever, Arctriever relies on the Contact Type to determine if the information should be placed into the Client or Contact table. By default, Arctriever assumes Clients use the Client Contact Type and Contacts use the Medical Provider Contact Type as shown in the image below. These values are system defaults that cannot be modified or deleted.

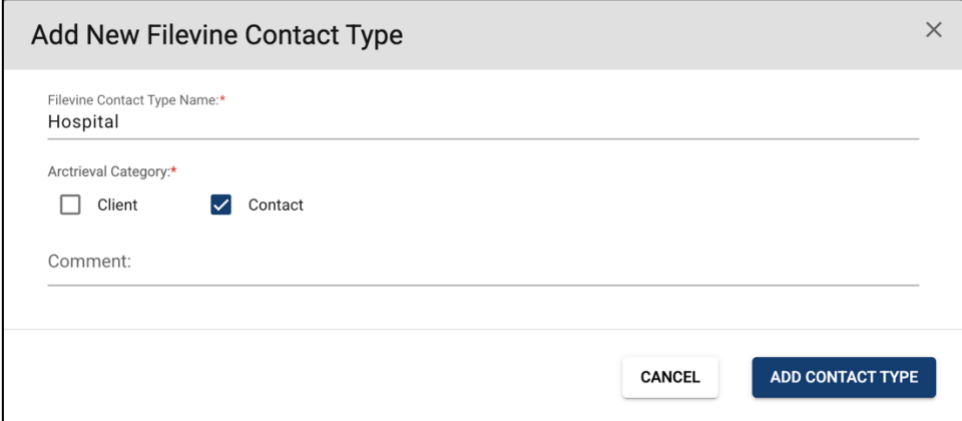

Filevine allows for multiple Contact Types to be assigned to a Contact record. Sometimes, other values may indicate that a contact record belongs to a client, such as a “Potential Client,” “PI Client,” or “SSD Client.” Similarly, other values may indicate a Contact record belongs to a medical provider such as “Hospital,” “Doctor,” “Urgent Care,” or “Ambulance.” As shown in the image.

Arctrieval enables you to associate multiple Filevine Contact Types with Clients or Contacts. Clicking the Add Contact Type button shows the following dialog box.

To add a Contact Type:

1. Enter the Filevine Contact Type Name in the space provided.
2. Check the box to indicate which Arctrieval Category the Contact Type belongs to.
3. Enter any Comment related to the Contact Type.
4. Click the Add Contact Type button.

Add New Filevine Contact Type [X]

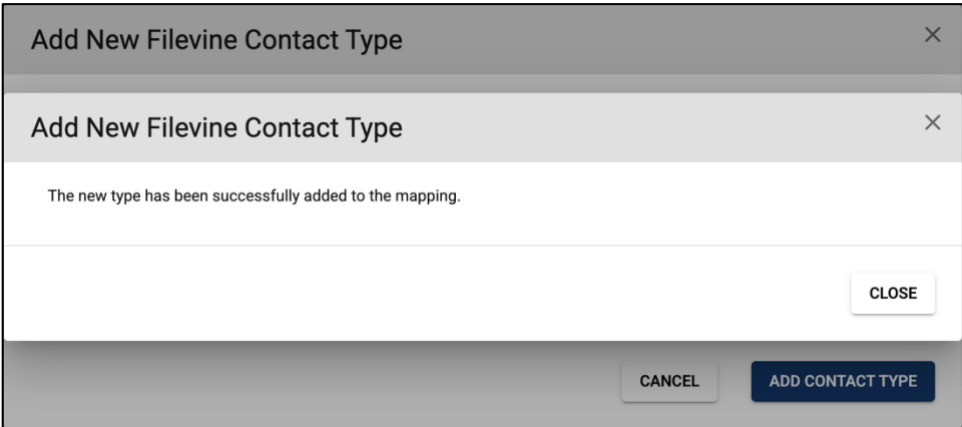

Filevine Contact Type Name:*
Hospital

Arctrieval Category:*
☐ Client ☒ Contact

Comment:

CANCEL ADD CONTACT TYPE

A confirmation dialog box is displayed when the action is successful.

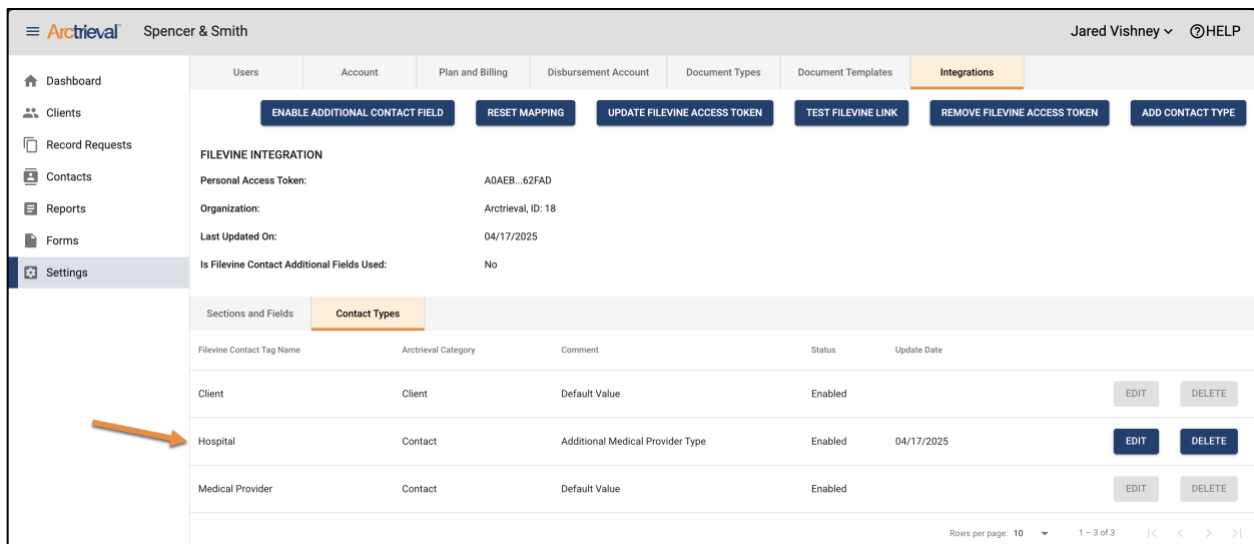

Add New Filevine Contact Type [X]

The new type has been successfully added to the mapping.

CLOSE

CANCEL ADD CONTACT TYPE

The new Contact Type is displayed in the Contact Types tab on the Integration page as shown.

Medical Provider	Contact	Default Value	Enabled		EDIT DELETE

Rows per page: 10 1 - 3 of 3 < > >>

12. Custom Project Section Configuration

If the default appearance of the sections, the layout of the elements does not match what you want to achieve from the integration, or you want to include the Arctrieval variables in an existing section, you will need to add the information to a section and adjust the field mapping.

Each field must satisfy specific requirements, including the correct section type, field type, field properties, and their locations relative to other fields. The section and field requirements for the 28 fields used by Arctrieval are outlined in the tables below.

If the widgets defined in the `arctrievalClient` or `arctrievalRequest` tables were added to different sections in Filevine, the Filevine Section Selector and Filevine Field Selector values must be mapped to the appropriate Arctrieval data fields.

For example, if the Filevine Project template has an Intake Section with information about the client, that is a good location for the `arctrievalClient` data fields. If the Filevine Project template contains a Medical Provider Section, that is a good location for the `arctrievalRequest` data fields.

The default values in the `ArctrievalClient.fvst` and `ArctrievalRequest.fvst` files are displayed on the Integration tab in the Section and Fields tab under the Settings menu.

Filevine Section Selector	Filevine Field Selector	Arctrieval Section	Arctrieval Field Name	
<code>arctrievalClient</code>	<code>arctrievalClientLast4SSN</code>	Client	Last 4 of SSN	EDIT
<code>arctrievalClient</code>	<code>arctrievalClientAliases</code>	Client	Aliases	EDIT
<code>arctrievalClient</code>	<code>arctrievalLanguagePreference</code>	Client	Language Preference	EDIT
<code>arctrievalClient</code>	<code>arctrievalPatientPhotoID</code>	Client	Patient's Photo ID	EDIT
<code>arctrievalClient</code>	<code>arctrievalIntakeForm</code>	Client	Arctrieval Intake Form	EDIT

The following requirements must be met to avoid errors when mapping the fields.

1. All fields in the list must be mapped to the correct fields in Filevine. The fields cannot have a duplicate combination of Section Selector and Field Selector values or there will be errors in the data sent from Filevine to Arctrieval.
2. All fields for the Arctrieval Request Section must be in the same Filevine project section.
3. All fields for the Arctrieval Request Section must be in a Filevine project section that is a collection.
4. All fields for the Arctrieval Client Section must be in sections of the Filevine project that are not collections.
5. The Section Selector and Field Selector values must meet the following conditions:
 - a. The specified section exists for the selected project type,
 - b. The specified field exists for the selected section, and
 - c. The field is the correct type and configuration.

12.1. Arctrieval Client Section

To process a request, Arctrieval needs additional information about the Client, which is not part of the default Filevine Contact Information. The required client information is specific to the Filevine Project for the client. There are two options to configure Filevine:

1. Use the pre-built Arctrieval Client section and import it into an existing Project Template in Filevine using the provided ArctrievalClient.fvst file. The process is described earlier in the document.
2. Add the required Custom Fields/Widgets to an existing Section already defined in an existing Project template through the Filevine Customs Editor. Any changes to the Filevine Section Selector or Field Selector values in Filevine must be updated on the Arctrieval Setting -> Integration tab.

The values in the table below show the information in the ArctrievalClient.fvst file. The Section Selector is arctrievalClient {{arctrievalClient.field}}.

Widget Type	Header Text	Widget Selector	Row	Order in Row	Visibility	Visibility Property	Locked	Notes
Sub Section Header	Arctrieval Client Information	arctrievalClientInformation {{arctrievalClient. arctrievalClientInformation}}	X	0	Show	Always	False Unchecked	
Instructions	Data Update Notes	one direction	X + 9	0	Show	Always	False Unchecked	<p>Important Note:</p> <p>==</p> <p>After the Send Request to Arctrieval Task Flow was completed for one request in the project, updating this data will not update the data in Arctrieval.</p> <p>--</p> <p>To update the data in Arctrieval, you must log into Arctrieval and manually update the specific data for the Client in Arctrieval.</p> <p>--</p> <p>Any changes made here after a request is sent to Arctrieval are ignored.</p> <p>--</p>

Field Type	Field Prompt	Field Selector	Row	Order in Row	Visibility	Visibility Property	Required	Locked	Notes

File Attachment	Arctrieval Patient's Photo ID	arctrievalPatientPhotoID {{arctrievalClient. arctrievalPatientSPhotoID}}}	X + 2	0	Show	Always	False Unchecked	False Unchecked	Auto-tags - None Auto-move to Folder - None
File Attachment	Arctrieval Intake Form	arctrievalIntakeForm {{arctrievalClient. arctrievalIntakeForm}}	X + 2	1	Show	Always	False Unchecked	False Unchecked	Auto-tags - None Auto-move to Folder - None
Yes/No	Arctrieval Personal Representative	arctrievalPersonalRepresentativeBoolean {{arctrievalClient. arctrievalPersonalRepresentativeBoolean}}	X + 3	0	Show	Always	False Unchecked	False Unchecked	
Text-Single Line	Arctrieval Personal Representative First Name	arctrievalPerRepFirstName {{arctrievalClient. arctrievalPerRepFirstName}}	X + 4	0	Show	When "Arctrieval Personal Representative" Equals: Yes	True Checked	False Unchecked	
Text-Single Line	Arctrieval Personal Representative Last Name	arctrievalPerRepLastName {{arctrievalClient. arctrievalPerRepLastName}}	X + 4	1	Show	When "Arctrieval Personal Representative" Equals: Yes	True Checked	False Unchecked	
Dropdown List	Arctrieval Personal	arctrievalPersonalRelationship	X + 5	0	Show	When "Arctrieval Personal	True Checked	False Unchecked	Dropdown Items: - Parent, - Legal Guardian

Field Type	Field Prompt	Field Selector	Row	Order in Row	Visibility	Visibility Property	Required	Locked	Notes
	Representative Relationship	{{arctrievalClient. arctrievalPersonalRepRelationship}}				Representative" Equals: Yes			- Medical Power Of Attorney, - Next Of Kin,- Other Display As: - Dropdown
Text-Single Line	Arctrieval Personal Representative Relationship Other	arctrievalPersonalRepOther {{arctrievalClient. arctrievalPersonalRepOther}}	X + 6	0	Show	When "Arctrieval Personal Representative Relationship" Equals: Other	True Checked	False Unchecked	
File Attachment	Arctrieval Personal Representative's Photo ID	arctrievalPersonalRepPhotoID {{arctrievalClient. arctrievalPersonalRepPhoto}}	X + 7	0	Show	When "Arctrieval Personal Representative" Equals: Yes	False Unchecked	False Unchecked	Auto-tags - None Auto-move to Folder - None
File Attachment	Arctrieval Personal Representative Relationship Documentation	arctrievalPersonalRepRelIDoc {{arctrievalClient. arctrievalPersonalRepRelIDoc}}	X + 7	1	Show	When "Arctrieval Personal Representative" Equals: Yes	False Unchecked	False Unchecked	Auto-tags - None Auto-move to Folder - None

Notes:

1. The Arctrieval widgets and field type can be placed anywhere in the target section, such as at the beginning, middle, or end. As such, the Row value X represents where the Subsection Header is placed. The placement for all other widgets and fields directly relates to the Arctrieval Sub Section Header placement.
2. The Obsolete option is not displayed in the above table because the value will always be False-Unchecked.

12.2. Arctrieval Request Section

Arctrieval needs information for each Request to process it, such as the Contact, Dates of Service, Information to Request, Type of Request, etc... Request information is needed for each request sent from Filevine to Arctrieval. A Filevine Project can have multiple requests for medical records, billing information, and imaging studies. There are two options to configure Filevine:

1. Use the pre-configured Arctrieval Request section and import it into an existing Project Template in Filevine using the provided ArctrievalRequest.fvst file. The process is described earlier in the document.
2. Add the required Custom Fields/Widgets to an existing Section already defined in an existing Project template through the Filevine Customs Editor. Any changes to the Filevine Section Selector or Field Selector values in Filevine must be updated on the Arctrieval Setting -> Integration tab.

The values in the table below show the information in the ArctrievalRequest.fvst file. The section selector is arctrievalRequest {{arctrievalRequest.field}}.

Widget Type	Header Text/ Widget Prompt	Widget Selector	Row	Order in Row	Visibility	Visibility Property	Locked	Notes
Sub Section Header	Arctrieval Record Request	arctrieval {{arctrievalRequest.arct rievalRecordRequest}}	X	0	Show	Always	False Unchecked	
Action Button	Send Request to Arctrieval	SendArctrievalRequest {{arctrievalRequest. sendRequestToArctriev al}}	X	1	Show	"Hide" When "Is Request from Arctrieval" Equals "Yes"	False Unchecked	Action Button Type: Taskflow Tigger Button Button Icon: Send  Widget Selector: sendRequestToArctrieval

Field Type	Field Prompt	Field Selector	Row	Order in Row	Visibility	Visibility Property	Required	Locked	Notes
Dropdown List	Request Type	arctrievalRequestType {{arctrievalRequest. arctrievalRequestType}}	X + 1	0	Show	Always	True Checked	False Unchecked	Dropdown Items: - Patient Directed to 3 rd Party, Patient Directed to Self Display As: - Dropdown
Person	Contact (Medical Provider)	Provider {{arctrievalRequest.Provid er}}	X+1	1	Show	Always	True Checked	False Unchecked	Limit to Contact Type: Medical Provider
Text – Single Line	Arctrieval ID	arctrievalID {{arctrievalRequest. arctrievalID}}	X + 1	2	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval—No Filevine user enter.
Dropdown List	Requested Information	arctrievalRequestedInfor mation {{arctrievalRequest. arctrievalRequestedInfor mation}}	X + 2	0	Show	Always	True Checked	False Unchecked	Dropdown Items: - All Billing Records, All Medical Records, All Imaging Studies, Other Display As: - Dropdown
Text – Single Line	Requested Information Other	arctrievalRequestedInfor mationOther {{arctrievalRequest. arctrievalRequestedInfor mationOther}}	X + 2	1	Show	When “Arctrieval Requested Information” Equals: Other	True Checked	False Unchecked	
(Text – Single Line) or (Text – Multiple Lines)	Actual Requested Information	arctrievalActualRequested Information {{arctrievalRequest. arctrievalActualRequested Information}}	X + 3	0	Show	Always	False Checked	True Checked	Values will come from Arctrieval.
Date	Starting Date of Service	arctrievalStartingDateOfS ervice {{arctrievalRequest. arctrievalStartingDateOfS ervice}}	X + 4	0	Show	Always	True Checked	False Unchecked	After the value is finalized in Arctrieval and a request is submitted, Arctrieval will overwrite any user edits in Filevine.

Field Type	Field Prompt	Field Selector	Row	Order in Row	Visibility	Visibility Property	Required	Locked	Notes
Date	Ending Date of Service	arctrievalEndingDateOfService {{arctrievalRequest. arctrievalEndingDateOfService}}	X + 4	1	Show	Always	True Checked	False Unchecked	Value comes from Arctrieval after the request is sent; Arctrieval will overwrite any user edits in Filevine.
Date	Request Date	arctrievalRequestDate {{arctrievalRequest. arctrievalRequestDate}}	X + 5	0	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval after the request is sent.
Text – Single Line	Request Status	arctrievalRequestStatus {{arctrievalRequest. arctrievalRequestStatus}}	X + 5	1	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval after the request is sent.
Date	Request Due Date	arctrievalRequestDueDate {{arctrievalRequest. arctrievalRequestDueDate}}	X + 6	0	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval after the request is sent.
Date	Last Activity Date	arctrievalLastActivityDate {{arctrievalRequest. arctrievalLastActivityDate}}	X + 6	1	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval after the request is sent.
Date	Completed Date	arctrievalCompletedDate {{arctrievalRequest. arctrievalCompletedDate}}	X + 7	0	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval after the request is sent.
Amount – Currency like \$0.00	Request Expenses Total	arctrievalRequestExpenseTotal {{arctrievalRequest.arctrievalRequestExpenseTotal}}	X+7	1	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval after the request is sent and expense values exist.
Text – Multiple Lines or (Text – Multiple Lines(Large)	History (All date values shown are in UTC time zone)	arctrievalHistory {{arctrievalRequest. arctrievalHistory}}	X + 8	0	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval after the request is sent.

Field Type	Field Prompt	Field Selector	Row	Order in Row	Visibility	Visibility Property	Required	Locked	Notes
Text – Multiple Lines or (Text – Multiple Lines(Large)	Request Expenses List	arctrievalRequestExpense sList {{arctrievalRequest.arctrie valRequestExpensesList}}	X + 9	0	Show	Always	False Unchecked	True Checked	Value comes from Arctrieval after the request is sent.
Multiple File Attachments (List)	Files & Documents	arctrievalFilesDocuments {{arctrievalRequest. arctrievalFilesDocuments} }	X + 10	0	Show	Always	False Unchecked	True Checked	Files come from Arctrieval. Auto-tags - None Auto-move to Folder - None
Yes/No	Is Request From Arctrieval	isRequestFromArctrieval {{arctrievalRequest.isRequ estFromArctrieval}}	X + 11	1	Show	When “Arctrieval ID” Equals AAAA-0000	False Unchecked	True Checked	

Notes:

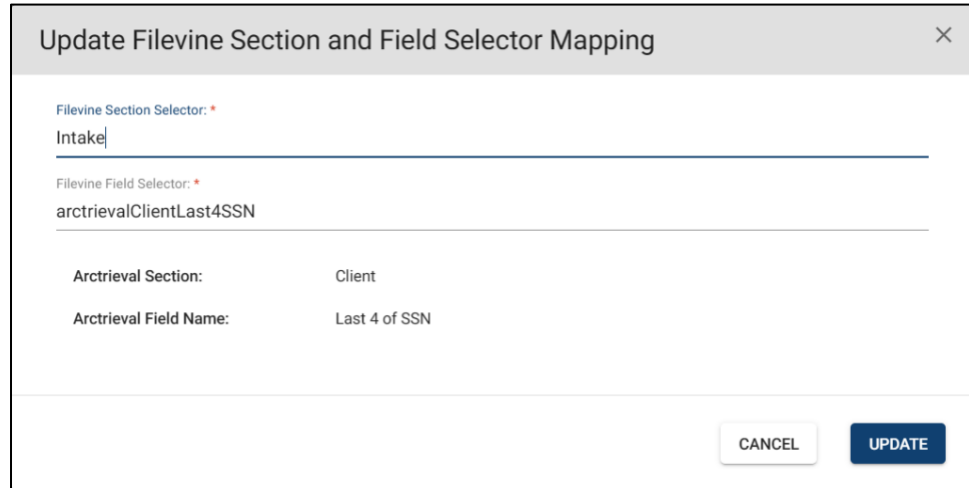

1. No additional settings for the Taskflow Action button are needed within Filevine because the trigger is a standard event. The only condition to work is that the Widget Selector Value matches what is specified in the Arctrieval <> Filevine mapping. When the Taskflow button is pressed, Filevine triggers certain actions, and Arctrieval users the webhook trigger event. Arctrieval receives an API request that contains information about which button in which project for which company was pressed and processes information by creating a Record Request.

The mechanism is configured when the Filevine integration information is entered, and the subscription is created. No other actions are required on the part of the user.

12.3. Edit Field Mapping

Click on the Edit button to display the Update Filevine Section and Field Selector Mapping dialog box, as shown in the image.

Enter the new values for the Filevine Section Selector or Filevine Field Selector, and press the Update button. The Filevine Section Selector value was changed from arctrievalClient to Intake in the example.

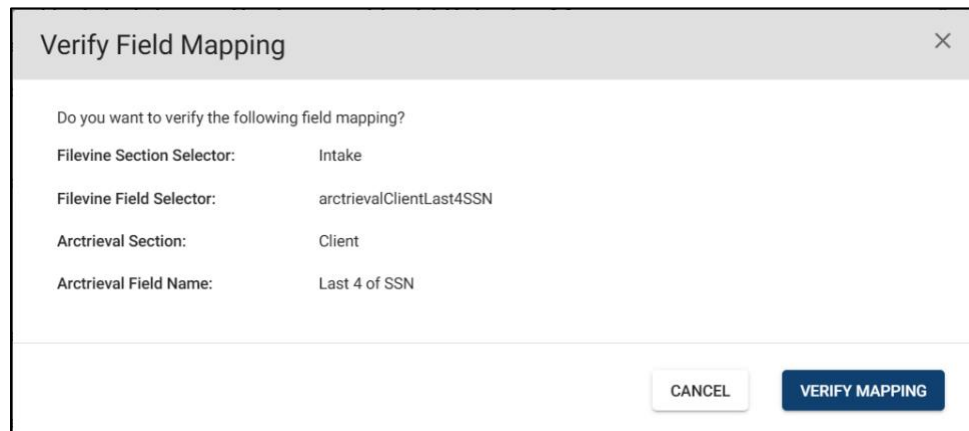

The dialog box is titled "Update Filevine Section and Field Selector Mapping" with a close button (X) in the top right corner. It contains two input fields: "Filevine Section Selector: *" with the value "Intake" and "Filevine Field Selector: *" with the value "arctrievalClientLast4SSN". Below these fields, there is a table showing the mapping:

Arctrieval Section:	Client
Arctrieval Field Name:	Last 4 of SSN

At the bottom right, there are two buttons: "CANCEL" and "UPDATE".

Pressing the Update button displays the Verify Field Mapping dialog box, as shown in the image.

If you update multiple values, you can verify each update as you go or wait until all the changes are made and verify the mapping for all Section Selectors and Field Selectors.

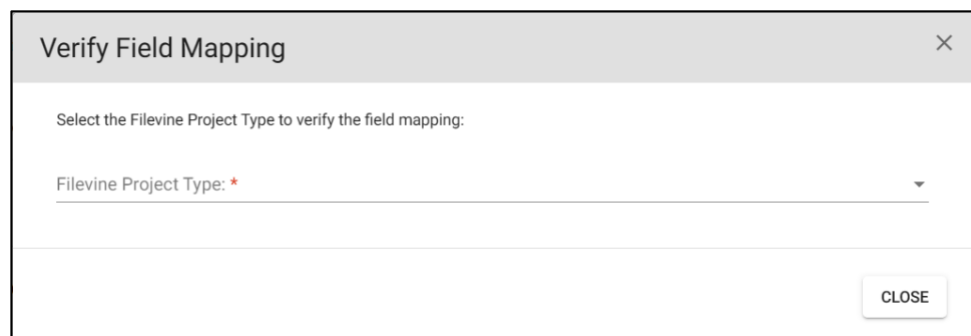

The dialog box is titled "Verify Field Mapping" with a close button (X) in the top right corner. It contains a question: "Do you want to verify the following field mapping?". Below this, there is a table showing the mapping:

Filevine Section Selector:	Intake
Filevine Field Selector:	arctrievalClientLast4SSN
Arctrieval Section:	Client
Arctrieval Field Name:	Last 4 of SSN

At the bottom right, there are two buttons: "CANCEL" and "VERIFY MAPPING".

Clicking the Verify Mapping button displays the dialog box shown in the image.

Select the Filevine Project Type to use to verify the field mapping. Arctrieval can be configured to work with multiple Filevine Project Types. Once the Project type is selected, Arctrieval immediately attempts to verify the field mapping.

The dialog box is titled "Verify Field Mapping" with a close button (X) in the top right corner. It contains a label: "Select the Filevine Project Type to verify the field mapping:". Below this, there is a dropdown menu labeled "Filevine Project Type: *". At the bottom right, there is a button labeled "CLOSE".

12.4. Field Mapping Errors

If there is an issue or error with the Section Selector mapping, the system displays the dialog box in the image.

The dialog box is titled "Verify Field Mapping" and contains the following information:

- Select the Filevine Project Type to verify the field mapping:
- Filevine Project Type: *
Arctrieval Client and Request Test
- There are errors in the Filevine field mapping that will prevent the integration with Arctrieval from functioning correctly.
- The following fields were configured incorrectly in Filevine:
- Filevine Field Selector: Intake.arctrievalClientLast4SSN
- Arctrieval Field Name: Last 4 of SSN
- Error: Section is missed.
- CLOSE

Arctrieval determined that the Section on the Filevine Project does not exist. The Filevine Section Selector value entered into Arctrieval does not match the value for any sections in the project. Correct the value in Arctrieval or edit the value in Filevine to match the value in Arctrieval.

If there is an issue or error with the Field Selector mapping, the system displays the dialog box in the image.

Arctrieval determined that the Field in the Section on the Filevine Project does not exist. The Filevine Field Selector value entered into Arctrieval does not match the field value in the specified sections in the project. Correct the value in Arctrieval or edit the value in Filevine to match the value in Arctrieval.

The dialog box is titled "Verify Field Mapping" and contains the following information:

- Select the Filevine Project Type to verify the field mapping:
- Filevine Project Type: *
Arctrieval Client and Request Test
- There are errors in the Filevine field mapping that will prevent the integration with Arctrieval from functioning correctly.
- The following fields were configured incorrectly in Filevine:
- Filevine Field Selector: arctrievalClient.arctrievalClientLast4SSNs
- Arctrieval Field Name: Last 4 of SSN
- Error: Field is missed.
- CLOSE

The values for field mapping errors are highlighted in red in the mapping table, as shown in the image.

The screenshot shows the Arctrieval Filevine Integration Setup page for user Spencer & Smith. The page has a sidebar with navigation links: Dashboard, Clients, Record Requests, Contacts, Reports, Forms, and Settings. The main content area is titled 'FILEVINE INTEGRATION' and includes a 'Personal Access Token' (ADAEB...62FAD), 'Organization' (Arctrieval, ID: 18), 'Last Updated On' (04/17/2025), and 'Is Filevine Contact Additional Fields Used' (No). Below this, there are tabs for 'Sections and Fields' and 'Contact Types'. The 'Sections and Fields' tab is active, showing a table with columns: Filevine Section Selector, Filevine Field Selector, Arctrieval Section, and Arctrieval Field Name. The first row is highlighted with a red border, indicating an error. The values in this row are: 'Intake' (Filevine Section Selector), 'arctrievalClientLast4SSN' (Filevine Field Selector), 'Client' (Arctrieval Section), and 'Last 4 of SSN' (Arctrieval Field Name). The other rows in the table have black text, indicating they are correct. Each row has an 'EDIT' button.

Filevine Section Selector	Filevine Field Selector	Arctrieval Section	Arctrieval Field Name	
Intake	arctrievalClientLast4SSN	Client	Last 4 of SSN	EDIT
arctrievalClient	arctrievalClientAliases	Client	Aliases	EDIT
arctrievalClient	arctrievalLanguagePreference	Client	Language Preference	EDIT
arctrievalClient	arctrievalPatientPhotoID	Client	Patient's Photo ID	EDIT
arctrievalClient	arctrievalIntakeForm	Client	Arctrieval Intake Form	EDIT

Once the error in the field mapping is fixed, reload the page, and the fields will appear in black. The red highlighting only occurs when a field has an error.

12.5. Field Mapping Verified

If all the field mappings are verified, the values in the mapping table will all be displayed in black. Any errors are highlighted in red.

The 'Verify Field Mapping' dialog box is shown. It has a title bar with a close button (X). The main content area contains the text: 'Select the Filevine Project Type to verify the field mapping:'. Below this is a dropdown menu labeled 'Filevine Project Type: *' with the selected value 'Arctrieval Demo-Limited Sections'. Below the dropdown is the text: 'The mapping is set up correctly, you can start using the integration with the current settings.' At the bottom right of the dialog is a 'CLOSE' button.

13. Arctrieval Role-Based Permissions for Filevine

When the Filevine Integration is active in Arctrieval, additional role-based permissions are available to determine whether or not an Arctrieval User may Unlink a Filevine Request, Filevine Client or Filevine Contact from the respective Request, Client or Contact record in Arctrieval.

The Arctrieval User Administrator sets the permissions through the User Account Information, as shown in the image.

The permissions to Unlink Filevine Request, Unlink Filevine Client and Unlink Filevine Contact are enabled by default.

14. Configuration Notes

14.1. Project Contact Data Mapping to Arctrieval

The data mapping between Filevine and Arctrieval assumes that the Project Contact is the injured individual and is mapped to the Client section in Arctrieval. The Project Contact can be an adult who is the firm's direct client or a minor child whose parents have engaged the firm to assist with the minor child's claim or case.

If the injured individual is not the Project Contact, you must configure the integration differently. For example, the Project Contact is the parent of a minor injured child. In this situation, the Project Contact is the minor child's personal representative when requesting protected health information. Please contact Arctrieval support if this is the case for you.

14.2. Company Field--Single Filevine Instance connected to multiple Arctrieval accounts

If a Filevine tries to send a request to an Arctrieval account that does not exist, the following happens in Filevine:

1. Arctrieval ID is set to Error
2. Request Status is set to No Arctrieval Account Exists
